Church Tower Being Repaired

Many citizens have paused to watch with interest the work being done on the tower of Christ Church. Those who have watched have wondered what exactly was being done. They saw the elaborate scaffolding put up to the very top and then very soon, it seemed, it began to be taken down. Naturaly many wondered why.

Before the work was done the passer by who looked up might easily have seen that there were many loose sihngles on the tower roof, that some were missing, that in places the wood was unprotected.

Last year the tower was repaired and the wood work painted as high as the belfry. An inspection of the tower above the belfry indicated that repairs were needed in addition to the obvious ones which it was possible to see from the street. In order to make a complete and thorough inspection as well as to effect the needed repairs, the scaffolding was erected. The main construction was found to be sound and now the repairs that are under way are expected to take care of the tower for more than another fifty years.

Out of 22 major canning crops produced in Maryland, tomatoes take the lead with a value of $9,394,706, according to the last agricultural census.

ABLEST OF THE EIGHTS is this mighty Buick Dynaflash Valve-in-Head Straight-Eight, with a cyclone in each cylinder to squeeze full power from every drop of fuel.

WHEN you've got something mighty good and *know* it, it's not easy to pass it up even for something better!

There's a whale of a temptation to play it safe, to coast along a while, when you're riding such a vote of confidence as we've had this year.

We had ample evidence from the start that our past season's good Buick was the life of the 1938 party.

Right through the darkest months it paced the industry in sales, setting a bright example that shone like a sudden sun smiling through the rain.

But itching in our heads and on our drawing boards were ideas.

★ ★ ★ ★

NO OTHER CAR IN THE WORLD HAS ALL THESE FEATURES

★ DYNAFLASH VALVE-IN-HEAD STRAIGHT-EIGHT ENGINE ★ BUICOIL TORQUE-FREE SPRINGING ★ GREATER VISIBILITY ★ HANDISHIFT TRANSMISSION ★ ROOMIER UNISTEEL BODIES BY FISHER ★ TORQUE-TUBE DRIVE ★ TIPTOE HYDRAULIC BRAKES ★ CROWN SPRING CLUTCH ★ "CATWALK-COOLING" ★ OPTIONAL REAR AXLE GEAR RATIOS ★ FLASH-WAY DIRECTION SIGNAL ★ SELF-BANKING KNEE-ACTION FRONT SPRINGING

Ideas that *started* with practical things like better cooling and more efficient aerodynamics and a wider field of vision for the driver and his folks.

Ideas that *wouldn't* stand still — that budded, burgeoned, flowered full into gorgeous new beauty of line and form and action.

Ideas that promised to re-pattern motor car design for the next half decade or more!

Now, the price of progress is daring to make good things better—even if you've got a winner to start with. Buick's whole come-back has been based on that.

We *couldn't* refuse to climb while empty rungs on the ladder beckoned us up!

So the life of the party now looks it. And you'll see a Buick for 1939 of very different pattern, a car fit to fix the fashion for many a long year to come.

"Buick's the Beauty!"
