# FARMERS' DEPARTMENT

"He who by the plow would thrive,
Himself must either hold or drive."

[From the Westminister Md. Advocate.]

### To Cure Bloat in Cattle.

MESSRS. EDITORS, SIRS:—Confident of your wish to make the *Advocate* as useful as possible, I therefore send you for publication a recipe for the certain and almost instant cure of cattle bloated:

Take as much gun powder as a man can hold in one hand, mix it well in a pint of milk by shaking in a long necked bottle, and drench with it; if the animal cannot swallow, put your hand down its throat and take out the obstruction, which can easily be done by taking it by the nostril and lifting up the mouth. I have just seen a cow badly bloated, cured in less than ten minutes by it, when the arm had to be put up to the elbow down the throat, and several handsful of grass taken out before she could swallow.

Having recently (before I knew of this remedy) lost a splendid young cow, and heard of many other losses by the same cause, I think all should know the receipe.

Yours Respectfully, &c.,
R. B. VARDEN.

*Willow Spring, June* 1871.

CUTTING BRUSH.—The brush that so much disfigures fence rows and meadows may be destroyed by cutting when in full vigor of growth. This period occurs about midsummer, and the fact has given rise to many wide-spread ideas that the length of the days has something to do with it. It is believed by some that the two "longest days" in the year are the proper ones. But it happens that there are more than two days in the year that are "longest days." In 1870, there were eleven days of equal length; in the present year there are ten in which the sun remains a greater length of time above the horizon than at any other season of the year. Others, who believe in the influence of the moon, refer to its changes as productive of the desired effects. But the moon is constantly changing, and so far from there being any sudden variation in its position (as from one quarter to another) its course during the whole month is made up of motions which change during every instant of time, and are in themselves inappreciable. And yet there are seasons when such operations as cutting brush and sprouts from stumps are more effectually destructive. Success depends wholly on their state of growth or condition, which in some years is more forward than others. It would seem reasonable that a sprout cut down when the sap is in its fullest flow would be more seriously injured than at any other time; and this is born out by experience. Therefore, we say choose that period and repeat the operation later.—Few bushes will bear two cuttings in one season, and if they survive one, they will rarely live through the second.

THE QUESTION OF WEEDS.—Every good farmer knows that to insure satisfactory crops his land must be cultivated in the best manner, and if it is so cultivated few weeds will be found upon it. Sometimes, even upon well managed farms, a field here and there, owing to adverse weather, a shortness of hands, or a rush of work generally, may be neglected for a few days and the weeds may get a start; but this happens rarely, and an observing man can always judge of the character of a farmer by glancing his eye over his premises. If the weeds are not to be regularly and systematically destroyed, the idea of conducting agricultural operations profitably may as well be abandoned, for the one is incompatible with the other.

And even this is more pointedly so with the garden. Weeds and a garden crop are as antagonistic as life and death.—They cannot stand upon the same platform. One must be master, and it is for the owner to say which. If a garden is systematically worked—and without system no garden is worth having—the labor of keeping down the weeds is reduced one half. But let them once get ahead, and they may be fought all summer and prove victorious in the end.

Again, let no weeds go to seed; and do not throw into the public highway as some do, to be washed down upon the land of your neighbor.—*Germantown Telegraph.*

CUTTING GRASS ON LAWNS.—To keep a lawn in good condition, it should be mown often, and as soon as the grass is cut it should be raked off, and not allowed to remain in a heap. If this is permitted for twenty-four hours even, heating will take place, and the growth is stimulated under the heap, and an uneven spot will be produced. If allowed to remain longer than this, when it is removed the grass will be found to be "blanched," and the color will be injured for the remainder of the season. Green Sand marl, where it can be obtained, makes an excellent top-dressing for lawns; it has the advantage of being perfectly clean, inodorous, and productive of a thick bottom, and is entirely free from foul seeds. During dry seasons, occasional waterings in the evening should not be emitted. If lawns are cut close and often, the grass may be allowed to remain, but only when cut over by a "mower," as the grass then is evenly distributed; if cut by a scythe, it will lie too unevenly, and must be raked off.

TIME OF CUTTING GRAIN.—The best time for cutting wheat is when the grain has acquired the consistence of stiff dough, and can be kneaded between the thumb and forefinger. Grain so cut is plump and heavy. Left until it is entirely ripe, it shrinks, and there is more loss from shattering of the seed and from broken heads—moreover, it has been proven by repeated experiments that wheat cut before it is fully ripe will yield 15 per cent. more flour than the same grain will produce when dead ripe.

WON'T SOMEBODY CAN?—The Newtown *Gazette*, under this heading, states that a liberal minded citizen of that town will furnish a large lot on the banks of the river rent free, for a term to be named by the tenant, to whomsoever will erect a packing establishment. Cheap oysters and fruits and daily water and rail communication with Baltimore and Philadelphia constitute the additional inducements.

PEACH TREE.—Examine the roots of the peach trees a few inches below the surface of the ground. If gum exudes the grub is certainly at work under the bark. Take a penknife and follow its course under the bark, and cut out the grub. Do not desist until it is found and destroyed. Throw wood ashes around the roots and cover all up again.

A FEW iron nails placed in a vace with flowers will keep the water sweet and the flowers fresh. This arises from the sulphur eliminated by the plants combined with the iron.

NEVER cut a fowls wing to prevent its flying. Pull out the flight feathers of one wing.

JOSH BILLINGS says, one of the fussiest scenes I ever listened to was two old maids waiting on one sick bachelor.

## FLOUR and MEAL STORE!

## Farmers Look to Your Interest

BLACKSMITHING
AND
WHEELWRIGHTING.

THE undersigned takes this method of informing his friends and the public generally, that I am still conducting both branches of the above business at KENNEDYVILLE. I keep on hand good material, and have in my employ first class workmen, thus enabling me to give satisfaction to all. I have now on hand the
**Smyrna & Newark Plough Castings**
such as Concave, Wiley and Heckendorn.
Also, on hand a splendid lot of
**STEEL CULTIVATOR TEETH.**
*Ploughs, Cultivators, Harrows, &c.,*
made to order and kept on hand. I shall also put up to order CARTS, WAGONS, DEARBORNS, &c., and special attention paid to all kinds of REPAIRING, at reduced prices.
Come one, come all, and see for yourselves.
Thanking the public for past patronage, I hope to merit a continuance of the same.
TILGHMAN SHAFER,
March 4—tf. Kennedyville.

## BLACKSMITH AND Wheelwright Shops.

THE subscriber hereby notifies his friends and the public generally, that he has opened the Shops near the Foundry, in Chestertown, where he is prepared to execute all orders for NEW WORK or REPAIRS with neatness and dispatch, and at low prices.

HORSE-SHOEING.

Having employed a first class horse-shoer, I will give particular attention to this branch of the business, and guarantee satisfaction.
WHEAT CRADLES made to order, or repaired, and Reaper and Mower Knives ground and repaired at short notice and fair prices
I respectfully request a share of the public patronage. JAMES LAMB.
March 4, 1871—tf.

## Galena Machine Shops

**PLOWS,**
CASTINGS,
&c., &c.

WM. A. HYLAND & CO., respectfully inform Farmers generally that they keep on hand, and are prepared to make to order all kinds of
**AGRICULTURAL MACHINERY,**
Such as HORSE POWERS and THRESHERS, CORN SHELLERS, PLOWS, HARROWS, CULTIVATORS, and Cultivator Teeth, best steel plate, at $3 per sett. They have now on hand about 20 tons of CASTINGS of very superior quality, and will be sold cheaper than they can be bought elsewhere. Our Castings need no recommendation as their reputation has been fully established by persons who have used them.
We are also prepared to attach DROPPERS to any kind of Reapers.
Thankful for the liberal patronage which has been extended to us in the past, we solicit a continuance of the same, feeling satisfied of our ability to give general satisfaction.

Clear and Harmless as Water!

**NATTANS' CRYSTAL DISCOVERY**
*FOR THE HAIR!*

A PERFECTLY clear preparation in one bottle, as easily applied as water, for restoring to gray hair its natural color and youthful appearance, to eradicate and prevent dandruff, to promote the growth of the hair and stop its falling. It is perfectly harmless and entirely free from any poisonous substance and will therefore take the place of all the dirty and unpleasant preparations now in use. In everything in which the articles now in use are objectionable, CRYSTAL DISCOVERY is perfect. It is warranted to contain neither Sugar of Lead, Sulphur, Litharage, or Nitrate of Silver. Bear this in mind when you want anything for your hair.
Clear and clean as water, it does not soil the scalp or clothes, is agreeably perfumed, and makes one of the best dressings for the hair in use. It restores the color of the hair more perfect and uniformly than any other preparation, and always does so in from 3 to 10 days. Virtually feeding the roots of the hair with all the nourishing qualities necessary to its growth and healthy condition, it restores the decayed and induces a new growth of the hair more positively than anything else. The application of this wonderful discovery also induces a pleasant and cooling effect on the scalp and gives the hair a glossy appearance.
☞We call especial attention to the fact that a limited number of trial bottles will be given away gratuitously to those desiring to try it. You will notice that in pursuing this course our aim is to convince by the actual merits of the article. ARTHUR NATTANS, Inventor and Proprietor, Washington, D. C., to whom all orders must be addressed.

WASHINGTON, D. C., Aug. 5, 1870.
Mr. Arthur Nattans:
*Dear Sir*—I do not hesitate to say that your Crystal Discovery deserves to supercede all other preparations claiming to restore the growth and color of the hair. I have used it a week now, and my hair has already returned to its natural color, and has ceased falling almost entirely. I cheerfully recommend it.
Respectfully,
fel1y. MRS. ANNIE MORRAIN.
*For Sale by C. F. STAM & BRO.*

**HALL'S Veg. HAIR RENEWER,**
Chevalier's LIFE FOR THE HAIR,
MONTGOMERY'S HAIR RESTORER
AYER'S HAIR VIGOR, and
BURNETT'S ROLLISTON.
For sale at WICKES' DRUG STORE

165 and 167 Baltimore Street,
ap8y. BALTIMORE, MD.

## A NEW ERA IN BELTING.

PAGE'S PATENT
**Tanned Leather Belt.**

Tanned in Oil and by the same process as Lace Leather, by PAGE BROS., inventors and manufacturers of the celebrated Page's Lace Leather.
These Belts are perfectly soft, and hug the pulley like pure rubber, thus giving 25 per ct. more driving power than any other belt.
They also have eighty per ct. more strength than the best oak-tanned belts.
They have been placed on pullies running 9,000 turns per minute, and in places where all other belts have failed, have given entire satisfaction, outwearing every other belt 50 per ct.
The fact that they are driving out of the market in the East, very fast, the other kinds of belt, is sufficient testimony.
All the large Eastern Factories now use them.
The following are a few of the many testimonials we have received:
*Messrs. Charles E. Inloes & Co.:*
GENTS:—We have been using Page's Patent Belt in our factories for over a year, and believe it to be the best and cheapest belt made. Best, because it is stronger and more durable than oak-tanned; and cheapest, because its adhesive qualities give it so much more driving power. Very respectfully,
R. H. THOMPSON,
Sup't Union Mfg. Co. of Maryland,
Ellicott's Mills.
*Messrs. Charles E. Inloes & Co.:*
GENTS:—The fourteen-inch Page's Patent Belt, bought from you, has been in daily use ever since, and gives perfect satisfaction, and you are at liberty to use our name in endorsing the qualities you claim for it, in every respect, as we believe it to be the best Belt made, and shall adopt it altogether in our mills. Very truly,
W. W. TUNIS & BRO.,
Oakland Steam Saw Mills,
Talbot Co., Maryland.
The following are a few of the parties now using it in Baltimore:

| | |
|---|---|
| R. Sinclair & Co., | Murrill & Keiser, |
| W. E. Hooper & Sons, | W. Wilkens & Co., |
| Magne & Chipman, | J. W. Butler & Co., |
| Liberty Mining Co., | Johnson & Waters, |
| P. S. Chappell, | L. M. Beebe & Bro. |

Congressional Globe Printing Office, Washington.
The Laps are all short, and besides, the usual copper rivets and glue are fastened by two rows of pegs guaranteed not to come out, which is a great advantage.

## Ayer's Hair Vigor,

**For restoring Gray Hair to its natural Vitality and Color.**

A dressing which is at once agreeable, healthy, and effectual for preserving the hair. *Faded or gray hair is soon restored to its original color with the gloss and freshness of youth.* Thin hair is thickened, falling hair checked, and baldness often, though not always, cured by its use. Nothing can restore the hair where the follicles are destroyed, or the glands atrophied and decayed. But such as remain can be saved for usefulness by this application. Instead of fouling the hair with a pasty sediment, it will keep it clean and vigorous. Its occasional use will prevent the hair from turning gray or falling off, and consequently prevent baldness. Free from those deleterious substances which make some preparations dangerous and injurious to the hair, the Vigor can only benefit but not harm it. If wanted merely for a
HAIR DRESSING,
nothing else can be found so desirable. Containing neither oil nor dye, it does not soil white cambric, and yet lasts long on the hair, giving it a rich glossy lustre and a grateful perfume.
Prepared by Dr. J. C. Ayer & Co.,

## COUGHS, SORE THROAT, ETC.

*No Medicine or Treatment can excel the Powerful Curative Power of*
DR. SIMMS'
**WHITE PULMONIC BALSAM.**
It cures with a rapidity unequalled by any other remedy offered for Throat and Lung diseases. It is recommended by over 2,000 persons in Wilmington, and hundreds in Philadelphia, Baltimore and other cities and communities throughout the country. Mr. Peaslington, of Wilmington, Illinois, writes that there is not (with a few exceptions) a family in that city who will be without it if possible to procure it. Such is its popularity wherever it is known—and this popularity arises from the fact that it universally cures all who use it. There is no case of *Coughs, Colds, Sore Throat, Asthma, Bronchitis, Croup, Blood Spitting, Hoarseness,* and even *Pulmonary Consumption,* where the system is not broken down with the wear of the disease, or pretended medicine, or inexperienced advice, that this Balsam will not cure if carefully used, according to directions. We guarantee it all we represent it to be, and invite a trial from the afflicted everywhere. Price, 50 cents, medium size, and $1 for large size bottles. Prepared only by
**J. H. SIMMS, M. D.,**
*Practical Organic Chemist,*
**No. 707 MARKET STREET,**
