KILLS HIMSELEF LIKE BROTHER

SYKESVILLE FARMER FIRES A BULLET INTO TEMPLE

In the same manner and at about the same hour of the day that his brother, Sidney J. Blunt, ended his life at Granite, Md., about eight years ago, William R. Blunt, 48 years old, a farmer at Sykesville, this county, shot himself in the right temple in a stable on his farm shortly after 7 A. M. Thursday. Death is believed to have been instantaneous.

His body was discovered by his widow, Mrs. Margaret Blunt, who went to call him for breakfast. Blood was streaming from a wound in his right temple and clutched in his right hand was a 38 caliber revolver. One bullet had been discharged.

Mrs. Blunt summoned Dr. Daniel B. Sprecher of Sykesville, who in turn summoned Albert M. Musgrove, justice of the peace. The two made an investigation, but were unable to establish a motive for the act. Blunt, they say, was formerly a prosperous farmer of that section, but retired about two years ago.

He was apparently in good spirits when he arose yesterday, according to Mrs. Blunt. As usual, he went to the stable while his wife was preparing breakfast. Failing to return in a reasonable time, Mrs. Blunt went to the stable, about 50 yards from the house, and found him dead. She declared that she did not hear the report of the pistol.

The case of the dead man's brother was almost identical. Leaving the breakfast table, he went to his room and fired a bullet into his brain, dying instantly.

MARKET QUALITY OF WHEAT IN CARROLL INVESTIGATED

Representatives from Washington and College Park with County Agent Fuller will investigate the quality of wheat offered for sale to the elevators and mills in Carroll. This investigation is being carried on in all the counties of Maryland. It has been brought about by the demand for reclassification of Maryland wheat. Most of the wheat sold is classed as garlicy wheat, which may contain a very low to a very high per cent of garlic but all suffer alike as to grade and price which is from five to fifteen or twenty cents under the same grade of wheat without garlic. As most of our farmers do not raise enough wheat free from garlic to be shipped by the carload they must take garlic price and suffer with the rest.

What is the remedy? Make new laws or produce clean wheat? The latter seems to be the best remedy. Produce wheat free from garlic. This can be done by improving the rotation on your farm. A four or five year rotation of corn, oats, wheat and grass, or grass two years will aid. Soy Beans in place of oats will give good results. Use more cultivated crops, and spend more time in growing a plot of wheat for seed. Plant clean seed, and clean infected fields by rotation and cultivation. This is a matter which will have to be remedied by the producer himself. Use only certified seed, and be a certified seed grower yourself.

We notice the Republican candidates for the various offices, in going around asking the support of the men voters, seem to forget about the women voting, or do not think it worth while to ask them for their support. In most cases, it is the women who urge their husbands to go to the primary elections.

AND THEN THE HATS GOT MIXED

This week two gentlemen, of this city, called on a mutual friend and, after a short time had been spent in swapping yarns &c., the host "treated" each of his guests to a good big drink of excellent liquor. Shortly thereafter the guests decided to seek some fresh air, as the liquor was getting in its work in fine shape, but when they got outside the house each "discovered" he had some other person's hat, neither of which fitted either of their heads, and, up to the time of going to press, the tangle had not been adjusted. We have been told that liquor acts differently with people—some get a swelled heads, for instance, and insist that some one has their hats.
