Balky Horses.

The Society for the Prevention of Cruelty to Animals put forth the following rules for the treatment of balky horses, which will bear reproduction:

1. Pat the horse upon the neck; examine the harness carefully, first on one side and then on the other, speaking encouragingly while doing so; then jump into the wagon and give the word go; generally he will obey.

2. A teamster in Maine says he can start the worst balky horse by taking him out of the shafts and making him go round in a circle till he is giddy. If the first dance of this sort does'nt cure him, the second will.

3. To cure a balky horse, simply place your hand over the horse's nose and shut off his wind until he wants to go, and then let him go.

4. The brain of the horse seems to entertain but one idea at a time; therefore continued whipping only confirms his stubborn resolve. If you can by any means give him a new subject to think of, you will generally have no trouble in starting him. A simple remedy is to take a couple of turns of stout twine around the fore leg, just below the knee, tight enough for the horse to feel, and tie in a bow knot. At the first check he will go dancing off, and after going a short distance you can get out and remove the string to prevent injury to the tendon in your further drive.

5. Take the tail of the horse between the hind legs, and tie it by a cord to the saddle-girth.

6. Tie a string around the horse's ear close to his head.

Useful Hints.

A lady thus recapitulates some of the valuable suggestions she has had the good sense to learn from her servant girls:

The other day Mary was ironing and asked for a piece of sand-paper to rub her irons on. I was astonished that I never heard of it before; it is nice, removes every bit of starch or anything else and makes them so smooth.

One girl taught me that old corsets make the best stove cloths. Just one-half at a time is a convenient size. They are ready made and much better, when unfolded, to take hold of anything with, than a made holder, and much easier to wash.

Another girl pours hot water on the blades only of steel knives and they wipe easily and do not need drying.

Another one told me the best way to keep hams and dried beef was to pack it in dry salt We have tried it several years with perfect success. An old salt barrel is convenient. Set it in some cool dry place; put quite a thick layer of salt in the bottom; then pack in the hams, using the pieces of dried beef, if you have any, for chinking; cover with salt again till the barrel is full. There is not the least danger from insects if the hams are smoked and the beef dried and put away early before the flies come around, and they are much nicer to handle than when put up in ashes or oats, or anything of that kind.

A NEW game called "granger seven-up," is announced. Three persons play for a can of oysters. The first man out gets a can of oysters, the last the can, and the 'middle man' don't get anything.

AGUE CONQUEROR.

No Quinine, Arsenic or Poisons.

This is strong language, as Physicians and Chemists have for years tried to compound a preparation that would entirely cure Fever and Ague without the use of strong medicines such as Quinine, Arsenic and other poisons injurious to the system. There is no case of Fever and Ague, Intermittant or Billious Fevers, Congestive Chills, Night Sweats, Liver Complaints, &c., that this remedy will not cure at once and permanently. It purifies the blood, Liver, Spleens, and all other secretory organs so effectually that the Chills will not return during the season, even when persons have had them for years. For Sale by C. F. STAM & BRO., Chestertown.
