The teaching of fire prevention and safety is to be made a part of the required coureses of study in the Kansas graded schools beginning with the next school year.

Electricity will be the main fuel and power of the future. We have barely entered the electrical age. Chained lightning is growing up into your best slave. The establishment of a telephone circut of over 5,5000 miles between Havana, Cuba and Santa Catalina Island, off coast of California is recent achivement of the Bell Telephone System. This is the longest circuit in the world and in constant use. The voice travels under sea, over mountains and by radio reaching its destination — all in one operation.

Contary to general belief, the American wage earner in 1923 is better off than during the so-called "peak" period of 1920, according to conclusions reached by the National Industrial Conference Board as a result of researches into wages and the cost of living in plants employing more than 6,000,000 men.

French tax on amusements in 1922 totaled 266,000,000 francs, applied to support of hospitals and charitable institutions.

She Said It

"I pronounce you man and wife," had just been spoken. Guests were tittering and kissing the bride and most of them were kissing the groom. To one side stood a Titian-haired beauty who was known to have jilted, or been jilted by (one never knows which) the proverbially happy bridegroom. "Have you kissed the bridegroom?" a hysterical guest shricked at her. "Not this evening," replied the beauty.—Omaha Bee.

The White Sheep.

Bishop Matthews, returned from a tour of the Southern states, brought back many stories of what he terms our Black Aristocracy. One of them goes: "That youngest boy of yours doesn't seem to do you credit, Uncle Mose," remarked the darky pastor to one of his parishioners. "No, sah, no, sah," replied the old man sorrowfully. "He is de wurstest chile I eber had; in fact he's de white sheep ob de family."—Argonaut.

He Was Some Tough

Two negroes were lying behind a packing case on the docks at Brest taking the labor out of the alleged labor battalion. Said one boastfully:

"Boy, Ah comes f'um a taugh breed. My old man done cut his nails wif a ax an' brash his teeth wif a file."

"Huh, ain't so tough. Mah ole man am a plumber, an twice a week he done shave hisself with a blow torch" American Legion Weekly.

To most everybody 30 x 3½ means USCO

NATURALLY USCO'S could hardly have delivered such money's worth—tire after tire—without making a clean sweep.

It's been a pretty performance every time—no two opinions about *that*.

And no two opinions about what *tire to get again* after a man has once used USCO.

United States Tires are Good Tires

What's Behind the Federal Reserve System

The extensive resources of the Federal Reserve System are great enough to cope with any financial situation.

This fact was very effectively demonstrated during the business depression of the past two years.

This bank is proud indeed, that it has the privilege to be a member of the Federal Reserve System and associated with an institution that means so much in our national banking business.
