No. 224 S CHARLES ST., BALTIMORE

REFERENCE—Farmers and Merchants' National Bank, or any reputable firm in our city.

U. A. Smith, Bridgeton, Ind., had kidney trouble for years and was so crippled with rheumatism he could not dress without help. He started using Foley Kidney Pills and says: "I began to get better at once and now all my trouble has left me and I do not feel that I ever had rheumatism. I rest well all night and though 59 years old, can now do the work of a man of 32 years. I would like to be the means of others getting benefit from Foley Kidney Pills." Refuse substitutes. Sold by W. A. Toulson.

Mrs. J. N. Hill, Homer, Ga., has used Foley's Honey and Tar Compound for years, and says she always recommends it to her friends. It never fails to cure our coughs and colds and prevents croup. We have five children and always give them Foley's Honey and Tar Compound for a cold, and they are all soon well. We could not be without it in our house." Sold by M. A. Toulson.

Mr. Julian C. Numbers returned on Thursday of last week after spending the summer at Camp Northfield, East Northfield, Mass. He was accompanied home by his friend, Mr. Clement Cornish, of Trenton, N. J., who spent ten days with him.

Wheat Growing Vs. Dairying.

I believe the best thing that has ever happened to Queen Anne's county is the failure of the wheat crop this year and the starting of creameries and cooling stations.

The farmers of this county have had a hard time for years trying to grow wheat and make a living at the same time. They have been like the Italian, who said that what he made on his peanuts he lost on his bananas. In growing wheat in this section farmers have not only lost the profits made on other crops and stock, but have lost the fertility of their farms. They have fed their land on dope (in the form of commercial fertilizers) until they have become dope fiends instead of farmers. I believe the cow, the creameries and silos will work a cure.

There are many farms in New York State that a few years ago were known as deserted farms, owing to their having become so poor and exhausted that farmers had moved away and deserted their fields. Today those same farms are worth from $100 to $400 per acre, owing to dairying. On the islands of Jersey and Guerney land is worth from $500 to $2,500 an acre and dairy cows have made them so valuable. Dairying in Europe is made profitable on land worth from $200 to $1,100 per acre. In fact farmers there are importing American feed and still making their land pay for dairy farming purposes.

I believe the land in Queen Anne's to be naturally as good as any in Europe and there must be some reason for this great difference in prices between our grain farms and their dairy farms or the dairy in this country, so we will compare wheat growing and dairying.

It is estimated by the Agricultural Department that when you sell a ton of wheat you have sold $7.90 worth of nitrogen, phosphates and potash. For every $10 worth of wheat you sell you sell off $3 worth of fertilizer. If you have sold $100 worth of wheat you have sold $30 worth of fertilizer.

When you have sold $1,000 worth of butter fat from a farm you have sold less than $1 worth of fertilizer from it, and you have put the soil in better condition than it was before.

If this estimate of the Agricultural Department is true it is easy to account for the difference in the price of dairy and wheat farms. In reality, the dairyman is selling air, sunshine and rain while the wheat farmer is selling gold dollars for fifty cents.—R. CLAYTON THOMAS, in Centreville Record.

NEW POSTAL LAWS

Extra Pay For Rural Carriers And Eight Hours in Ten for Clerks in Office.

The recent session of Congress which has just adjourned passed important postal laws affecting the department in Kent County. Rural carriers who make the full trip of twenty-four miles a day have their pay increased $100 a year, and those making shorter routes have their pay increased proportionately.

No mail may now be distributed to the General Delivery windows, or in the boxes or to carriers on Sunday, and clerks in the Postoffice are permitted to work only eight hours a day, these eight hours, however, to be within a limit of ten hours.

How One Washerwoman Was Converted to the Fels-Naptha Way.

Anty Drudge—"Why, bless my soul! Mrs. Old School, the washerwoman has seen the light at last and has adopted the Fels-Naptha way of washing."

Grocer's Boy—"She was forced to it, Anty Drudge. Mrs. Millionaire, her best customer, told her that if she didn't use Fels-Naptha she'd take her washing away. Was tired, she said, of having her clothes come back all yellow and some with streaks of dirt still in them."

A generation or so ago, if a woman had an errand she walked—she had to, there was no other way.

Later she could do it in half the time by riding. Now she can do it almost instantly, by telephone.

That's Progress, and Progress is made possible by science.

Fels-Naptha is science applied to the washday problem, and it's results are just wonderful.

Formerly washday was a time of sickening odors, back-breaking labor, a disordered house and the severest test on the clothes. This was necessary. There was no other way.

The Fels-Naptha washday—the scientific washday—isn't a washday at all in the old sense; merely an incident in the routine of household duties.

And if directions on the red and green wrapper are followed, the result is certain.
