EXPERT TESTIMONY.

J. H. Rittenhouse, C. E., Mining Engineer, of Scranton, Pa., has known the twelve mines of the Tortilita Gold and Silver Mining Co., since 1880, having spent a good portion of that and the following year at these mines. In a letter to the President of the company, Mr. Rittenhouse says: "I have been in a good many mining camps in Colorado, New Mexico and Arizona, and never saw any better indications on the surface or ore in such quantity and of such high grade anywhere as in the Tortilita Camp. To particularize: The desert mine is a large vein averaging about 8 to 10 feet thick, in one place about 30 feet. Ore taken from it in developement assayed from 30 to 40 ounces silver per ton, per 100-ton lot. I think the ore is there in quantity, and that a 10 or 20 stamp mill could be kept busy from it alone. The formation is about the same as the Benton. The other mines near the Desert were developed to a more or less extent by several shafts sunk upon the incline, showing well-defined walls and ore about same grade as the Desert. The Eagle is thoroughly defined and with bold (for that country) croppings. Ore carries more gold than silver, about $15.00 of the former and $15.00 of the latter, I think. As for the Jesse Benton and Tom Benton, I think the Jesse Benton is the bonanza of the camp. The average of the bulk of the ore taken from it is 70 to 75 ounces of silver; a little gold occasionally. As this ore was the best, more attention was paid to it and more work done upon it. It was thoroughly proved for a length of about 1,300 feet (twelve hundred) along the claim and the ore found about the same in all parts. I believe the Benton will prove itself to be one of the richest mines in Arizona. All indications point that way."

A limited number of the preferred dividend shares of the stock of the company owning these mines are offered for sale at $2 per share. Address Jos. H. Reall, 57 Broadway, New York, or 48 Congress St., Boston, Mass.

—A man took refuge in an Irishman's house during a heavy storm, but found it nearly as wet inside as out. He said: "Why, you have quite a pond on the floor!" "Yis; shure and we have a great lake in the roof."

"Scarlet Fever"

Having appeared in our village Darbys Prophylactic Fluid was used for disinfecting the College buildings. The disease never went beyond a single case, either in the College or elsewhere, where the Fluid was used.—Rev. Pres. G. F. Price, Auburn, Ala.

Darbys Fluid dispels all forms of epidemic disease by destroying the spores or germ posion that cause contagion.

—A very loquacious lady, calling one day to consult her physician, talked on and on with such volubility that the latter could not get in a word edgeways. Growing impatient, he at length told her to put out her tongue, which she did. He then said: "Now please keep it there till you have heard what I have got to say to you."

A Combination Policy

ISSUED BY

The Washington Life Insurance Company,

OF NEW YORK.

A Policy for $30,000 is a Contract for $45,000.

$45,000 increased by Dividends.

Amazing Results of Estimated Dividends.

Untrustworthy Estimates.

Estimates of tontines not reliable.

A Perfect Contract; its Strength and Simplicity.

Three Qualities of the new Combination Policy.

It covers all the Points.

The Policies of The Washington Incontestable, etc.

The man who buys a $30,000 Combination Policy of the Washington has a contract that secures to him, at maturity, $45,000.

This sum of $45,000 is augmented by accumulations, if they are not banked upon for premiums.

Applying the "estimates" used by agents of tontine companies to the dividends of the Combination Policy, the result is amazing!

"Estimates" are always misleading and untrustworthy.

The "estimates" of tontines are by no means trustworthy. If they were, the holders would not seek redress from the Courts.

The Combination Policy is a perfect contract. All it proposes to do is guaranteed in strong and simple terms; hence its superiority over all speculative, visionary, and uncertain forms of insurance.

The Combination Policy has three distinct functions; by it a man secures—

1. Protection for a Term of Years.
2. The Savings of an Endowment.
3. Permanent Insurance for Life.

Dividends at End of 1st Year.
Dividends Annually Thereafter.
Dividends Payable in Cash.
Dividends Purchase Additional Insurance.
Dividends Non-forfeitable.
Dividends Protect Policies.

Say the amount of the policy is $30,000. During 20 years the holder is insured for $30,000. At close of period he receives $30,000 Cash, together with all accumulated and unused dividends; also a paid up life policy for $15,000.

Policies on this plan, from $1,000 to $30,000.

The Policies of The Washington are incontestable, with privileges of residence and travel unrestricted.
