Featuring the DYNAFLASH ENGINE and TORQUE-FREE SPRINGING—in the Most Modern Chassis in the World

THE GAS TREADLE in the new Buick looks like any other. The wheel has a familiar feel in your hand. But under that long, proud bonnet is an

engine unlike any you've ever known And giving silk-smooth levelness to the

ride is springing such as no other car 'tires last longer. The whole car handles can boast. What happens in the Dynaflash engine

happens in no other car. Fuel is converted into tiny, fist-size cyclones-and the cyclompression that results makes gasoline give up more performance than ever before in any commercial engine! Matching Dynaflash power in impor-

tance is Buick's new Torque-Free Spring-ING and the arroflite ride it provides.

Old leaf-type springs are gone. Each wheel has a soft, shock-smothering cushion of stout coiled steel.

No shackles, no spring covers, no grease points. Nothing to go wrong, wear out or clog with dirt, rust, grease. Skid risks are blessedly reduced. Rear

more easily. Whether it's power you're after or matchless comfort and security, you'll want Buick this year. And with the DYNAFLASH engine and Torque-Free Springing you

get half a score of other features. You can learn about them all from your nearest Buick dealer, now waiting to tell you the engineering "must" story of the
