EASTER WEATHER IN DECEMBER DOES NOT

It was as though President Roosevelt had decreed Easter before Christmas, and then conspired with the weather. Eastern Shoremen, some hostile, others friendly, last week-end and during recent warm days, showed their attitudes in their dress. It was both spring and winter in the shopping centers of the various towns where the stores have dressed their windows for the Christmas trade. Bells, snow scenes, holly and tinsel proclaimed the calendar season. But it was warmer outside, looking in.

coat collars thrown back, men tilted their hats a further back on their heads, left their coats open. Fathers held their children on their shoulders to see over the heads of tall shoppers. It was warm, window shopping, and no one was in a hurry. But there were those, in spite of the weather, who did not think it was spring. The small children were bundled up ir snow suits and gaiters. Only the

young men, and not many of

those, went without overcoats.

Automatic Stoker?"

Read about these other advantages

automatic Anthracite stoker installa-tion takes fuel from the bin, feeds the fire, and removes ash to sealed containers-you need never handle fuel. DOES IT MAINTAIN TEMPERATURE AUTO-MATICALLY? Yes. No matter what the outside weather is, the upstairs temper-ature control maintains even heat for health and comfort.

DO I HAVE TO BUY A NEW BOILER? No! Your furnace was designed to burn

WHAT WILL I SAVE? Savings are huge. Users report big economies - half the cost of oil, still greater savings over gas. DO I RETAIN ALL THE ADVANTAGES OF ANTHRACITE? Yes-no smoke, no smell, no smut or soot. No explosive starts. Dependability-from a constant fire. CAN I HAVE YEAR-ROUND HOT WATER? Yes-at a fraction of the cost of other fuels, you can have an abundant, constant stipply of hot water the year-round.

It's the easiest automatic heating equipment to buy! Initial costs are low. Budget terms are liberal. The F.H.A. plan is available. Best of all, fuel savings pay for the added convenience.

See what happens when you replace oil heat with an Anthracite stoker. Users say: "Cut oil bills down to less than half with our new stoker"; "Saving over \$70 a year with our new stoker, compared with oil."

That's not all you save. You save in cleanliness-for Anthracite is the solid fuel that will not smoke. There's no smudge or smut, no soot with Anthracite. It saves house cleaning, laundry, decorating bills.

You also save worry—for Anthracite can not spill or leak, does not smell, and can not explode. It gives constant, steady heat from a fire that's never out. With an automatic stoker you can enjoy all possible conveniences and avoid expensive fuels.
