Farmers!

If you want to solve the labor question, one of the most effective ways to help do so, is by the use of the Farm Tractor.

With a 10-20 Tractor and 3 Bottom Plow, one man can do the work of 9 horses and 3 men and do more work in the same length of time.

We represent the I. H. C. line which has passed the experimental stage and shown beyond doubt their ability to perform steady and constant service.

Remember too that these machines use the cheapest kind of fuel reducing the cost of operation to the lowest point.

Now if you are thinking of buying a Tractor anytime this year, better see us and get your order in now, as it will be impossible for all customers to be supplied on account of shortage in material and labor.

We will be glad to furnish any informotion.

Donald C. Thompson's Thrilling War Pictures, direct from the Trenches of Europe.

War As It Really Is

¶ Pictures that tell their own grim story of the horrors of a battlefield—picturess that dascribe as no tongue can tell the awful scenes of human slaughter—scenes where cities are devastated, humanity made fodder for cannon, families scattered and lost, and where lives are but pawns on a great blood-reeked "chess-board of war."

SEE Thompson's "dare-devil" ride in a French areoplane which at a height of 10,000 feet engaged in a fierce battle with a German Taube, and destroyed it. Thomson, with a nerve of steel, kept his camera going through it all—the most exciting feature ever recorded on a film.

SEE Actual fighting on French line front at point where German trenchess were only 20 yards away with capture of many German prisoners, the curtain of fire driving Germans to surrender wholesale. Armored trains with 16-inch guns bombarding a fort.

SEE The great offensive of the Somme at Verdun, Fleurecourt and Metz. Salonika from an areoplane, with Navy Dirigible rising from a warship. And hundreds of other startling scenes.

NAVIGATION OPENED

After nine weeks of ice and snow causing the closing of navigation the steamer Joppa made the trip to Chestertown Tuedsay. Because of heavy ice at mouth of river the steamer was unable to make Rock Hall. Capt. Wm. Taylor says this is the longest freeze in the history of the Company. Before Christmas the boat missed one or two trips because of ice, but on December 28th the ice was so heavy that no boat could get thru.

The Ericsson steamer went up the bay Wednesday but did not stop at Betterton.

Rock Hall and Betterton hope to have a boat today.

WHEAT WILL BE $2.27

President, in Fixing Price, Says He Expects Farmers To Loyally Accept New Schedule.

President Wilson on Saturday raised the Government guaranteed price for the 1918 wheat crop as high as $2 28 a bushel in one primary market and in varying sums in all other primary markets except four. The Chicago price was put at $2 20 and the Baltimore price at $2 27.

Acting under authority of the Food law, the President thus met the agitation in Congress for higher prices and took steps to stimulate production and prevent holding back the crop while the agitation was going on.

The wheat must be harvested in the United States during 1918 and sold in the market before June 1, 1919. The President's proclamation states that the action is to meet an emergency requiring the stimulation of wheat planting.

COST OF GROWING TOMATOES

The Caroline County Tomato Growers' Association, asked for records of results of tomato cost survey that has begun one year ago. These records were handed in by practical farmers in various sections of the county, and an average of all the reports kept showed that the cost of growing an acre of tomatoes to be $69.40, and the concensus of opinion was that tomatoes could not be grown in that county at a profit for less than 60 cents per five-eights basket.

In Delaware the cost of production for one acre finally decided upon is as follows and will be sent to the Food Administrator: Man labor, $2.00 a day horse labor, $1 50 a day:

NOTICE!

TO THE FARMERS AND TO THE FARM LABORER

The District Board has placed nearly all farm laborers in class 2, provided they continue to work regularly on the farms.

I would suggest to the farmer if he knows of a farm laborer who is in class 2, and who is not working regularly, report to me and the registrant will be put in class 1 and sent to camp.

HARRISON W. VICKERS,
Government Appeal Agent.

The best advice we can give growers of tomatoes is to contract this year. A meeting of county agents from various States with the Food Administration took place in Washington Monday in reference to the price the farmers would have to receive for tomatoes during the season of 1918. Various figures were submitted for the cost of production in 1917, varying from $54 to $100.25 an acre. $30 a ton will be the lowest figure to induce farmers to grow tomatoes for 1918. Twenty-one dollars per ton is the price the packers will pay the farmers for their tomatoes during the coming packing season This price was fixed by the government Thursday in an announcement on behalf of both the Army and the Navy.

**Institutes for farmers will be held in Kent next week. There will be sessions at 10 a. m. and 1.30 p. m., with four speakers of wide reputation. The ladies of Kennedyville Red Cross Union will serve sandwiches and coffee at lunch hour in Weer's Hall.

Free Lecture.—If you want to hear something about the war in Europe attend the free lecture at Washington College next Wednesday evening at 8 p. m. The lecturer will be President Lyman P. Powell, of Hobart College, and the subject is "What an Educator Learned at the Front." Prof. Powell spent a considerable time in France and had some experiences in the fighting zones that are very interesting.
