AMERICAN SENTINEL.

WESTMINSTER, - MARYLAND.

JOS. D. BROOKS, Editor.

Entered at the Postoffice at Westminster, Md., as Second-class matter.

FRIDAY, APRIL 1, 1910.

The $500,000 bond issue proposition is like a Confederate note ; no one cares to own it.

About the time the Democrats get through legislating for and building roads the flying machines will be a commercial and mechanical success and we will not need the roads.

We in Maryland are now facing a considerable increase in our tax rate and if something is not done to curb the extravagance in road building, appropriations and many other matters we will soon be compelled to pay at least 25 cents.

This is a rural community with a little bit of manufacturing thrown in to break the monotony, but some of the Democratic politicians had an idea that we were a metropolis and would stand for any old tax rate. They know a little better now. Don't they ?

The people of Carroll county are not nullifiers. They are a hard working and honest class of people who have no use for a lot of Southern Maryland Democrats who, in order to get in or keep in office are eternally, tampering with our election laws. Patience has about ceased to be a virtue and the storm will soon break.

When William Marbury made that sound money speech in Odd Fellows' Hall, this city, a few years ago he called on the colored men present to come to the assistance of the sound money Democrats and Republicans of the state. Everyone knows that in that campaign the "colored troops fought nobly." Now, Mr. Marbury would rob them of the right to vote. Why ?

Maryland is a law abiding State, or at least has been in the past, and we feel certain that the Democratic politicians who, for their own personal gain, are endeavering to cast a cloud over her, will get their just deserts in the near future.

Maryland was true to the Union and will not stand for the Black Flag of nullification or the waiving of the Bloody Shirt.

The Grange stands for advanced thought and improved methods and is a molder of public thoughts. Thirty years ago it declared in its declaration of purpose, in favor of teaching the science of agriculture in the public schools.

Many farmers, not members of the Grange, have insisted upon it being done. The Democratic party of Maryland has persistently refused the request but the day of political reckoning is fast approaching.

In the midst all the talk and grumbling about high prices don't let us forget that there are no Coxey's Armies traveling along our county roads and filling our Alms house and jail ; and none to be ordered to "keep off of the grass" by the Democrats at Washington.

Prices may be high but then everybody has employment, while under the last Democratic administration prices were very low and nearly everybody was out of employment.

A few years ago Mr. William Marbury, who is now advocating the passage of the so called Digges disfranchising law, come to Westminster and addressed a large audience in Odd Fellows' Hall on the subject of sound money. He said the advocates of free silver had raised the Black Flag of Repudiation.

If newspaper reports are true he is now raising the Black Flag and the Bloody Shirt. The Mason and Dixon line must have been moved down to the Severn river.

Some years ago some of the farmers of this county, in the fond hope of bettering their financial condition, invested part of the little money they then had, in a great many enterprises which later turned out to be bad. In those days they were like the drowning man, willing to grasp any old straw in order to save themselves. The bitter experience of the past has made them stronger in character and taught them lessons in economy and business.

Today they are, as a class, a match for any of the schemers, including politicians of the Democratic ring variety.

The Supreme Court, in an opinion handed down by Mr. Justice Harlan, has said :

'Beyond question the adoption of the Fifteenth Amendment had the effect in law to remove from the State Constitution or render inoperative that provision which restricts the right of suffrage to the white race. Thenceforward the statute which prescribed the qualifications of jurors was itself enlarged in its operation so as to embrace all who by the State Constitution, as modified by the supreme law of the land, were qualito vote at a general election.'

And yet a young, briefless, Democratic lawyer from Southern Maryland would have the people of this state enact a law in direct violation of that decision.

Back, back, back to the pines of Southern Maryland.

The fact that the colored voters of this county generally vote the Republican ticket and thereby help the latter party to keep the Democrats in the straight and narrow path, should not be looked upon as an evil. Suppose they are disfranchised, thereby giving the Democrats a safe majority of 500 or 600 in the county, how much corruption would creep into our county government inside of a year or two? And what chances would an anti-organization Democrat have against the organization ?

If the colored voters voted the Democratic ticket do you think the present legislature would dream of attempting to disfranchise them ? Some of the Democrats, notably Ex-Governor Warfield, think they ought to be disfranchised because they consistently vote the Republican ticket. Wouldn't the same argument hold good against the Democrats who consistently vote the Democratic ticket "just as it is printed ?" But do the colored voters consistently vote the the Republican ticket ? We know that about 40 of them in Westminster, a few years ago, voted for Dr. J. W. Hering and thereby elected him to the Maryland Senate, and that he has been in office ever since. We also know that quite a number of them voted for some of the candidates on the Democratic ticket three years ago.

If what we have said be true then why do the organization Democrats want to disfranchise them? Why?

The Advocate of last week said :

"Now why should the people in the three Western counties of Maryland, Garrett, Allegany and Washington and the four great Northern-Central counties of Frederick, Carroll, Baltimore and Harford, which border on Pennsylvania, be made to suffer for the benefit of Southern Maryland and the Eastern Shore ?"

We heartily agree with our esteemed contemporary and join in the chorus. Why ?

If all the books, magazines and newspaper articles on the subject of religious toleration in Maryland were burned it would be better for all of us. The newspaper discussion now going on will only create bad feeling between certain religious sects and will accomplish nothing. Erect no monument at Annapolis; burn all the books on the subject; let the dead bury the dead and then let us whirl around and get some of the pure religion, undefiled before God.

Better Educational Facilities.

The problem of improving the public school systems in the country districts is deservedly attracting universal attention. It is conceded that one of the disadvantages that render farm life undesirable is the backward condition of our rural schools, and that the improvement of these schools would be an important factor in making country life more attractive. The United States Bureau of Education can, in co-operation with the school officials of the various states, render valuable assistance in securing the adoption of such changes as will establish the new kind of school recommended in the President's message to congress, which will give the farmers' children a proper education for country life. The extension of that bureau's activities along these lines will be urged by the Grange, and this matter will be brought to the attention of congress, so that suitable appropriations may be made.

The farm boy and girl have the same rights and should demand that school facilities in the country should be at least equal to the city school and that they be given an opportunity to receive a technical education along the lines of scientific agriculture and domestic science, thus glacing them on an equal plane with others who have received this special training along other lines ; provided always, of course, that they be first well grounded in the rudiments of spelling, reading, writing and arithmetic.
