understanding was, that he was not to send her to Baltimore, until he heard from me. I have been absent from home four or five weeks and have not long returned and sent off as soon as I could make the necessary arrangements —

I hope you will give Mr Sampson all necessary information & Directions in procuring Aurora and getting her off from Baltimore on his way back as quick as possible by water as the weather is uncertain and ice may be apprehended, so as to obstruct the steamboats.

Please give the pedigree, you sent to me and will attend to them with pleasure and when I look over them, I will make some remarks and send back those, that have not yet appeared in the Farmer.

I am very Respectfully Yours.

George W. Jeffreys
