### THE RACE FOR ARMAMENT

the United States had prepared for some trade or business. sunk our ships by her submarines. to study his trade. Towns that have worth by their swagger style. But now things are different.

auction. People under excitement of day is going to be the foreman or competition get to bidding higher than employer of to-morrow. they expected. If the United States put up \$1,000,000,000 to beat Japan THE ESSENTIAL DIFFERENCE this year, then next year Japan might | The controversy between socialism put up \$2,000,000,000 to beat us. Then or bolshevism, and "capitalism," so DISPOSITION OF the United States would have to put called, comes down to the question up \$3,000,000,000 to beat them. It is whether the individual shall or shall easy to see everybody's finish.

If, on the other hand, you could get If you belonged to a company several of the leading powers to agree people who were settling a new not to build a single warship for five country, which of two plans would years, everyone would be relatively you adopt? Would you have it arjust as well off, and taxes would be ranged that all your food products greatly reduced.

They look good. They would do a lo to straighten out the difficulties under which the world is now struggling.

The United States is the riches country on earth, and it could bea out the others in this competitive race get the biggest army and navy in the world, it will promote so much expenditure among other powers, who are unwilling to be left behind, that the world will be bankrupt.

Is it worth the cost? Would the United States be any more secure after spending these vast sums money thus encouraging other powers to play the same game? Why not all quit now by general agreement?

WHY SHOPPING PAYS for standard articles are about the munity with products at a minimur same in all places. They argue that to get good goods, you must pay about the standard price, so you might as well walk into any good-looking under such a system than under the store and call for what you need and

pay the price. That such a theory will be costly mon of selling prices on five standard lines often double the product of a work- a whole very prosperous, and 1921 of cotton goods. It priced these lines ing force. in 11 stores in New York and Boston. If so, he produces as much as all It found on one line, for instance, that those working under him.
