This Company, incorporated by the Legisla-This Company, incorporated by the Legisla- ing in small doses, as early as possible after ture of Maryland for the Manufacture and Sale hatching. Its great value is as a preventive. of Fertilizers, are now prepared to furnish the agricultural community with their products. Deriving their supply of material from t richest of the recently discovered deposits o Bone Phosphates in South Carolina, they have established, and will inflexibly maintain, a higher standard of Fertilizing value than any eimilar productions bitherto in the market. While the material they use contains 60 per cent, of Bone Phosphate of Lime, it is guaranteed to contain a larger percentage of Soluble Phosphate than any heretofore used.

Fine Ground Bone Phosphates,

Price \$30 per Ton in Bags. Containing by the average of the Analysis of Professors Piggot, Leibig and Poplein, 60.20 per cent. of Bone Phosphate of Lime. The unusual per centage of Soluble Phosphate will make this form very desirable to Farmers who prefer to use it in its natural state or manipulate for themselves.

ALKALINE SUPER PHOSPHATE Price \$50 per Ton in Bags. This Preparation has special reference to the

growth and development of the Seed or Grain, and is intended for the soils that produce large erops of Straw, and small crops of Grain. Ammoniated Super Phosphate,

Price \$55 per Ton in Bags. Adapted to Lands that require a full development of the crop, both Straw and Grain. The superiority of the South Carolina Phosphate is fully demonstrated by the fact that at all times safe and effectual in its operations most of the leading Manufacturers of Artificial Fertilizers are now using, or making arrangements to use it, as the Phosphatic base of their Preparations, and large quantities are being | BELTS for Corpulency, falling of the Womb. shipped to Europe.
