IT Is So.—Mr. Greeley has published UNITED STATES INCOME TAX. T. W. ELIASON, JR., To the Farming Interest of Maryland in the Tribune several official letters prov-

Having received the Agency for the States of Maryland and Delaware for the sale of RUSSEL COE'S

AMMONIATED

I desire to make some allusions thereto, and if possible correct the impressions that are being made as to the real merits of this mattere. It is stated by some that the cost of making this or any other Phosphate does not exceed twenty-five dollars per ton, and that the manufacturers are doubling their profits from the farming community every year. To correct this mistake I am prepared to show that while there may be spurious Fertilizers manufactured and palmed off as genuine, it is not so with the manufacture of Russel Coe's Ammoniated Super Phosphate; that the body and bulk of bis Phosphate is made of Bone-black and dissolved bones -at a cost of \$21 per ton for the former and \$30 per ton for the latter, besides the other elements that enter into its composi tion, to say nothing of the heavy expense that is incurred by the high price of labor and exhorbitant freights, leaving the manufacturer but a very small profit for the heavy outlay of capital. It is true there may be Phosphates used by our Farmers, the entire cost of which to the manufacturer might not exceed \$25 per ton, as some suppose, but it is not so with Russel Coe's, as the ablest Farmers who have used the same for 15 years will give written certificates to its superiority over any other manure now being used in this country, and the analysis show its valuation far superior to any other on the market. All wanting this article can be supplied

Original Coe's Phosphate, fresh from the factory on a very reasonable credit, or a liberal discount for eash. Depot for the States of Maryland and Delaware located at SMYRNA, Kent County, Del.
