Agricultural Experience.

1. All soils are benefitted by being under-drained, but the benefit is most apparture, or having a subsoil retentive of mois-

2. After drainage, subsoiling and good cultivation are necessary to secure a good crop on heavy soils.

3. Lime is the best manure to apply to strong clay soils. It renders them more pervious to light and heat, and alse cor- . the public to their well selected assortrects their acidity by combining with some | ment of of the chemical salts in the soil, making plant food of poison.

4. Summer fallowing is the most efficient and profitable means of preparing strong soils for wheat, and of beginning a rotation, after grass has been grown for a length of time.

5. Green crops ploughed under, when THE undersigned is now manufacturing and March 4-tf. but if this is done too often successively, Look at the Prices: the soil becomes overcharged with carbon- Nos. 10 & 11 Concave \$9, No. 2 Pratt & Davis \$9 Wheelwright Shops. aceous matter.

6. Leached ashes applied in large quan- No. 4 Wiley too much vegetable humas, will greatly ameliorate their condition and render them

7. There is no soil so poor or sterile but some mode may be found of ameliorating or enriching

8. Blowing sands may be gradually nade productive by spreading six inches of straw over them, to remain till rotted. Then seed thickly with clover on the surface, without plowing, and when the clover has taken hold and becomes established, pasture sheep upon the land for two or three years preparatory to manuring and cultivating it. 8. Two successive grain crops on the

same land leaves it very foul. 10. Summer fallowing ameliorates a soil, and if properly done gets rid of most of the weeds and noxious plants.

DEEP PLOUGHING .- If farmers will turn their lands over one inch deeper than it needle. was ploughed the last time, and follow pound Cranks, the turning plough with a subsoil plow, | Shafts ufficient to make the crop ninety-nine should have one. out of a hundred years. They will find also that the wettest seasons will not effect their crops nor hinder them from working them; also that crop grasses will not grow nor flourish half as well on deep Notice to Farmers as on shallow ploughed lands, because grass flourishes better on packed than on loose soils. Soils improve faster from the same causes when plowed deep; and the "PEOPLE'S HARNESS STORE," labor to keep a crop clean of grass, and to with everything in my line of business at CITY keep the earth loose in making a crop, is | PRICES. We have a fine stock of far less on deep than shallow plowed lands, for the same reasons. Farmers, after burying the vegetation deeply, as it figures. A good stock of ought always to be done, should never element that will turn up to the surface and SPURS of all kinds. -the corn being a deep, and the grass a shallow feeder .- Richmond Herald

fruit trees, even when they have been at the shortest notice. carefully dug up and as carefully set out again, often suffer much from subsequent neglect. A little additional labor, not costing a tenth of the expense and work of procuring and transplanting them, will do much towards their subsequent success. Trees which were set last autumn need particular attention. The soil has become settled and hard about them, and crust will form unless the surface is kept loosened and mellowed. Keep the crust OPPOSITE THE COURT HOUSE. constantly broken; let the soil be entirely free from all weeds and grass, and pervigor; and the nurserymen will not be from Chain by the yard; Carriage, Plow and so likely to be blamed for sending "bad Tire Bolts by the hundred or dozen, from 15c trees," when the only fault was the neglect of the planter.

SUPPORTING TOMATO VINES .- This pop- Jackson & Brown manufacture.
