This would then make it advisable that when oats are thrashed the chaff should be saved for feed. It may be fed in the place of cut On the Corner opposite T. B. Hynson's. chaff, with the usual wetting, salting, and mixing of the regular allowance of meal. In years when hay is as scarce as in the resent, not only the chaff may be fed, but the oat straw should be carefully saved for fodder. It is quite as nutritious as timothy that has gone to seed.

DEATH TO BUGS .- The following recipe for destroying bugs on squash and cucumber vines has been successfully tried for years. It is certainly worth a trial:

Dissolve a table-spoonful of saltpetre in a pailful of water; put one pint of this around each hill, shaping the earth so that it will not spread much, and the thing is done. Use more saltpetre if you can afford it-it is good for vegetables, row in the earth at night, and fail to rise Goods sold cheap for Cash. in the morning. It is also good to kill sep24. the grub in peach trees; only use twice Notice to Farmers as much, say a quart or two to each tree. There was not a yellow or blasted leaf on twelve or fifteen trees to which it was applied last season. No danger of killing vegetables with it. A concentrated solution applied to young beans makes them
