THE EUREKA

NINETEENTH CENTURY!

HEattention of Farmers and Mechanicsia I particularly directed to the combined economy, utility and practicability of the WE.T. TORLINSON. measurement, and the fit of all Garments is Yard in the rear of their Carpenter Shop, up Eureka Mill, and to the many other advantagesit possesses over every other Fanning Mill which has been introduced to the public. It is the fruit of long and patient investigation by the inventor, who has made it his constant study for over twenty years. He has secured several patents for Mills, and bas always been rewarded with the best of success. But notfeeling satisfied with histormerattainments, he determined to reach the climax, and he now believes that his new invention will warrant him in exclaiming in the joy of his heart, like the philosopher, Phythagoras-EUREKA! - signifying in the Grecian language, "I have found it." This has given the name to this new Mill. In this Millare alltheformerimprovemente still greater advantages than were at first an-

to which have been added several more, adding icipated, or even thought possible by theinventor himself. It embraces the three great assentials necessary in every invention : It combines ECONOMY, UTILITY and PRACTICABILITY!

THE "EUREKA" MILL Issmall and lighter, and is capable of doing more and better work in a given time than

any other Mill ever invented. IT IS THE ONLY MILL that will successfully remove from wheat all such pests as Cockle, Garlic, Oats, Rye, &c. Should an extra quality of grain for seed or gristing purposes be required, it can be so arranged as to catch in one box perfect grain, and in the other, grain fit for market or mill. Here is made a great saving usually lost sight of : for nearly one quarter of the grain cleaned in the common Milisis lost when sown, on account of shrunken kernels and inferior grain The Eureka Millsaves all this, and gives seed every kernel of which will grow when put nto the ground, and this saving will, in a hort time, pay for the Mill.

Chestertown, Maryland, the arm-a positive feed on three sides of the Owners of the Mill, are having them manufactured at the Sash Factory and Planing Mill of pound Cranks, Wire Springs or Revolving | Noland & Co., Port Deposit, Md., which is a guarantee that they will be put up in the best
