Broad Neck, Kent county, Md., Mr. J. W. Hickman, - Dear Sir: I used Spring at the rate of 400 lbs. to the acre The land was heavy and what is termed tions of the field I used barn-yard manure iberally applied. Other portions of the field were planted without either, for the purpose of testing their real as well as The corn produced by the Centennia was fully equal to the manured portion o

vorable season, the investment proved a

very satisfactory one to me. When pro-

perly applied it will certainly pay to use

fied with your Centennial Fertizer that Buck Neck, Feb. 6, 1878.

Mr. J. W. Hickman, - Dear Sir: I used

several kinds of fertilizer on corn last The Centennial gave the best results, and I am satisfied is the best corn fertilizer I have ever used. The land was of a frenchy nature, but the Centennial and FENCING. effectually prevented it. JAMES SHUSTER. Still Pond, Kent county, Md., Mr. J. W. Hickman, - Dear Sir: The two and one-half tons of Centennial Fertilizer I bought of you last May was a

plied for corn in the following manner with satisfactory results: I spread 300 lbs. to the acre in the furrow after the crosser-dropped the corn on the fertilizer and covered with the plow. I left forty rows across the field with out fertilizer; at cutting time I cut those forty rows and shocked them separate .-The adjoining forty rows to which the fertilizer was applied as above stated was also cut and shocked separate. The two shock rows were separately husked and measured with the following result: All of which they propose to sell at prices The fertilized row gave one hundred and thirty-six (136) bushels of marketable corn, or about fifty (50) bushels to the acre, while the row without fertilizer gave

> t eighty-three (83) bushels, or about (30 thirty bushels per acre. The increase fodder was in about the same proportion

Respectfully, JAMES S. HARRIS. Hanesville, Kent county, Md., J. W. Hickman, - Dear Sir: In reply to results of fertilizers applied to corn, permit me to say, I have made several experiments during the past few years, with

Last spring, after plowing and thorough "residuum" (in the proportion of one to three) per acre. The "residuum" is supposed to contain potash, and was used with the view of preventing frenching. The result was a good crop - greater b

Lynch's, Kent county, Md., Mr. J. W. Hickman, - Dear Sir: I have always been opposed to commercial fertil izers, and only when compelled have I MY stock of Peach is all sold except | izers, and only when compelled have I about 4,000 Early Beatrice, Early used them. From previous hard tillage of its chief recommendations to me. The corn was planted on the 11th day of May, with two hundred lbs. of your Centennial to the hill per acre. The result has been a mystery to me. Also, about 600 Standard Bartlett Pear | the corn was high enough to brush the
