Putting in the Wheat Crop.

A singular discussion arose in the panot know of any extended and satisfactory experiment in this country, so as to test rate what a foreigner would call very land, however, where close calculation is much more the rule in farming among the more intelligent than with us, there is growing feeling in favor of wide drills. set them as wide as ten inces, and the reports, especially this year, are in fa-

The great trouble with most of the exeriments of this kind is, when made in experimental grounds, that they extend but over a single season, when it is only AT A. after trials through a series of years that a general rule can be formed. It makes a great difference, for instance, whether the experiments are made through a dry there is a deficiency of moisture in the ground, a wide row will have the advantage over a narrow one, as there would not be enough for all. In other seasons when there is more moisture, and enough for all, the result might favor closer rows. So also the nature of the soil might make much difference. A soil which does not dry out easily will permit of closer sowing. The one element of moisture for the growing crop alone makes a consider- Act of 1876: average of years would show what would from said list of qualified voters and from be best on the whole, and we should like to see such figures .- Germant'n Telegraph.

Than any other fertilizer sold, except OUR EXCELSIOR, and is made with the same care and supervision; uniform quality guaranteed. Fine and dry, in excellent order for drilling. We have also a very superior quality of

> and keep constantly on hand a large supply of high grade PERUVIAN GUANO. J. J. TURNER & CO., 42 W. Pratt st., Baltimore. July 26, 1879—3m.

Pure Dissolved Bones,

Attention, FARMERS!

The undersigned PIONEER in the manufacture of FERTILIZERS in this city, and engaged, since 1858, first as a member of the firm of J. J. & F. TURNER, BY WHOM the formulas and processes of manufacture of

"Excelsior" and "Ammoniated Phosphate," Were originated, and since 1864 a member of the late firm of J. J. TURNER & CO. (dissolved 19th March, 1878,) relying upon his experience and personal reputation, hitherto acquired in the uniform excellence of these Fertilizers as manufactured by him, offers them in his own name to the agricultural public. Having secured the Works of the old firm, 111 McElderry's Wharf, with the complete machinery, specially constructed for their uniform manipulation, he will continue the manufacture of

On his own account, with his office adjoining the works, where he will be pleased to see his friends and patrons, assuring them that the Fertilizers manufactured BY HIM M. A. HYLAND & CO., shall be of the same uniform and high standard quality as sold by the old firms since their introduction.

The above are the most concentrated FERTILIZERS ever offered to the Farmer bining all the stimulating qualities of Peruvian Guano and the ever durable fertilizing properties of Bones, in fine, dry powder, prepared expressly for drilling in with the Grain—and it is the universal opinion of the Farmers of Maryland and Virginia, afterover twenty years' experience in the use of the "EXCELSIOR," manufactured by me, that an application of 100 pounds is equal in its effects to 200 lbs. of any other Fertilizer or Guano, therefore fully 50 per cent. cheaper.

With my present advantages and superior facilities for manufacturing, I challenge competition with any Fertilizer sold in the United States in Quality, Mechanica Condition and Price. By strictly adhering to my Original Formulas, using only the most concentrated materials, and superintending in person their manufacture—as for the past twenty years— Uniform Quality is Guaranteed.

Farmers to secure the ONLY GENUINE EXCELSIOR AND PHOSPHATE prepared according to my original formulas established in 1858, should see that every Bag is branded as above, with the Analysis and my name in Red Letters. J. Q. A. HOLLOWAY, Originator and Manufacturer,
