Credit System a Great Hum-

bug in Every Respect. DESIRE through the columns of this paper to say that on and after SEPTEM-BER 1st my business will be conducted on the CASH SYSTEM, and in order to sell Clothing and Underwear cheaper than it has ever been offered in this market I

ust have the cash for everything pur-

chased from my store. If I were to con-

tinge the credit business, I would be comselled to add largely to my capital, carry a much larger stock of goods, which would nean heavier taxes and insurance, besides paying out many dollars for postage and stationery to send bills and statements, and occasionally trust a party who would never

pay, and the account would be lost. By

doing a cash business all this is saved and

I will be better able to give better goods and better styles than I otherwise could for the same money I have studied the question carefully and fail to find a single advantage in the credit system, either to my customers or myself. You run no risk when you pay the cash, as the money in every case will be refunded where goods are unsatisfactory. In conclusion I would say to the CASH CUSTO-MERS of this county I want your trade, and in exchange for your cash I will give winter cheaper than you ever bought it before. My old books will be closed up at once and never again will I credit any one from my store. The price will be the same
