WASHINGTON LETFER From Our Regular Correspondent WASHINGTON, Oct. 24, 1892.

Senator Quay is in Washington; he came to look after some of his private business, but he also looked after some political matters. Everybody who knows the Senator knows that he never talks for publication on things political. During the campaign of 1888 the only newspaper interview he gave was on the night of the election, when rising from his desk at National Committee the growing prosperity of the counheadquarters, and turning to a group try under the McKinley tariff law of newspaper men said: "Well boys, is what we find it the hardest to talk it's all over, except the shouting, and against, and what will elect Harrithe victory is ours." He is just the son. A big mistake was made by same Quay now that he was then, the Chicago convention in not adoptand he who thinks he can find out ing the tariff straddle prepared for it from him what he is doing or going by Whitney, instead of that infernal to do is doomed to disappointment. free trade plank; it was another big Nevertheless I can say upon good, mistake to have inserted that conauthority that he will go to New founded state bank plank. Were York this week to assist in the elect- Cleveland a saint, instead of a very ion of Harrison and Ried, in fact he ordinary man, almost entirely lackhas already been assisting very ing in tact, he could not be elected materially, as the good work that is on such a platform, and nine out of being done to expose and prevent every ten men on the stump for him fraudulent registration and voting know it as well as I do. We were in New York city, by National Com- licked the minute that platform was mitteeman Martin, is the result of adopted; but, of course, we shall fight Senator Quay's advice and sugges- to the end, hoping that the closing 1880..... tions. MILES, in the Senate, and in largely cutting at once. down the Democratic majority, if not actually controlling the next House of Representatives. The Democrats are whistling to keep up their courage, but they are feeling decidedly squeamish over the outlook; the latest news from Indiana sent a shiver down their backs, as it made it plain to them that the Hoosier state would give the President a larger majority next month than it did in 1888. For the first time in many years the National Democratic Committee has had to send money into North Carolina, and well informed Democrats admit that unless the third party movement in that state can be stampede there is a probability that its electoral votes will be cast for the Republican ticket. Republican advices from West Vir- Chester RIVET Steamboat Co ginia say that state is almost certain to go Republican, and prominent Democats openly class it as doubtful. The Republicans have done no bragging about Virginia, but the still hunt that has been conducted in the Beginning Monday, October 10, 1892, state has already placed it in the will leave Chestertown for Baltimore at doubtful column. and What Will it Do? curious to know how on instrument so small and so simple can accomplish cures so great. Now, while the Electropois is very wonderful, it is not at all mysterious. Its operations fall in with what we know of science, and any one at all familiar with the simplest facts of Bialogy and Physics can

HOW IT OPERATES. - The vay in which the Electropoise accomplishes its cures in very simple and natural. It consists of a polarizer, which is connected by a woven wire cord with a small plate, and garter. This polarizer is immersed in cold water, or put on ice. The plate at the other end of the cord is attached to the warm body of the patient, generally at the a ikle. From the inherent nature of this polarizer it becomes negatively charged. By the well-known laws of induction, the plate, and with it the body of the patient, becomes positively charged. The body thereby becomes a centre of attraction for negative of matter in nature. Hence the body, bathed in the atmosphere, drinks in the life-givbodies. Oxygen is the most negative form ing oxygen at every pore. Every process of life is thereby qickened. The temperature rises; the pulse throbs with a fuller beat; the skin tingles with new life; every organ acts with renewed vigor, and the effete poisonous products of the body are thrown off with ease.

That quickened change of matter which oxygen produces throughout the system, is PLAIN accompanied by a largely increased genesis of Nerve Force. Organs half dead and stagnan, are born again, and begin to perform their wented functions. The heart, the lungs, the liver, the organs of the external senses, the organs of reproduction-all these throw off their derangement and weakness, and even the disordered intellect is .151,809 oftimes re-enthroned.
