Taking all things into consideration, the corn crop is the most, im-portant staple crop of this or any GREAT DISCOVERY! other country. It is the bread, and produces the meat for nine-tenths of our entire population, besides a large amount exported to aid in keeping down the balance of trade between LLL ULL the United States and Europe. Immense quantities are by distillation

America. Among the four millions of people engaged in agriculture, but few are found in any part of our expansive domain who do not to a greater or less extent cultivate this valuable and indispensable plant food. There are not less than I, 200,000,000 of bushels of corn grown Be Sure to Send for Catalogue, which will be Mailed Free. [mar 20-3m.] per annum in this country.

Indian Corn, or Maize, is purely a plant, or grass, indigenous to the Western Hemisphere. It is suited growing under the burning suns of the South and in the cold regions of the North, and in the highest luxuriance from the Atlantic slope of the Middle States to the Pacific Ocean. Its uses are innumerable. The green or cured stalks and blades are the best of food for all kinds of stock; the grain in an unripe condition is a delicious vegetable, and when ripe may be cooked in a hundred ways to make palatable nutricious and healthful for food man and beast.

facts, our corn growers, almost without exception, have done nothing to increase the productiveness of this plant, but year after year, plant the same slovenly way that was pursued by our forefathers a hundred years ago, relying on the natural ergies of the corn of itself to grow and bear grain.

We think it not an under-estimate to place the present average product in the middle and Northern States at not over four barrels or twenty bushels per acre, except on the new and fertile lands of some Western States, in the blue-grass region of Kentucky and a few favored sections of limited extent in the Middle States. Yet by proper culture 200 bushels, as has been accomplished, might be grown; certainly, with but a little more labor and a small outlay in money, the CHEAP GOODS average crop of the country could be doubled or trebled, at the same time the land on which it grew would have increased in fertility to insure a better small grain crop and a good stand of grass .- Md Farmer for April

NATIONAL BUTTER ANN EGG ASSO- DRY GOODS, CIATION .- The butter crop of the United States is now greater in value than either the wheat or provision crop; and by making these fact public, it is sought to have the trade and indeed almost everything generally kept in a assume a position in relation to the other trades that has not heretofore lam selling good calico at from 5 to 6 cents per been accorded to it. The President syard; musling from 6 to 12 cents per yard, and all other articles correspondingly cheap. of the Association has offered prizes, ALL KINDS OF PRODUCE TAKEN IN EXCHANGE FOR amounting to \$1,000, for essays on Goods offer has met with a prompt response carrying on at Whiteleysburg the the subject of butter-making, which made and paid, and now the large made and paid, and now the large solicited.

BLACKSMITHING AND WHEnters in this business, and am prepared to do any work in this line at the most reasonable prices.

A share of the public patronage is respectfully roughly published on this subject. Similar offers are to be made from time to time by the association, and the information thus obtained will be Tin Plate & Sheet Iron Worker, given gratuitously to the world.

DURRATION OF MANURE.-In order to know what an outgoing tenant should receive tor the permanent improvement he had made in the soil, it was decided by a farmer club in Scotlard that the beneficial "Excelsior" Cook Stove. effect of horse, and cow and town manure, guano, bones and caprolites lasted four years and the rate of exhausting was fourtenths less each succeeding year. Lime on the arable land was suppossed to last ten years, as it performed a chemical action as important as its plant food. Nitrate of soda lasted only IMPORTERS and JOBBERS for the growing crop, and sulphate of staple & Fancy Dry Goods, Cloths, A FULL LINE WHICH ARE MARKED TO SUIT of amonia didn't last like guano .-This opinion of the Scotch farmer's club may be like the verdict of some NOS. 405 & 407 MARKET ST., juries-quite wide of the facts-but it is of interest as an estimate.

CLOSING CRACKS IN CAST IRON STOVES .- Good wood ashes are to he sifted through a fine sieve, to which is to be added the same quan. LUMBER DEALER, tity of clay thoroughly pulverized, together with a little salt. The mixture is to be moistened with water First Yard South of Pratt St. Bridge enough to make a paste, and the crack of the stove filled with it. The FLOORING, cement does not peal off or break away, and assumes an extreme de feb22-1 gree of hardness after being heated. |-The store must be cool when the w.s. coslin. stance may be used in setting the plates of a stove or in fitting stovepipes, serving to render all the joints

LICE ON STOCK .- A very simple remedy is to scatter a few dry wood ashes along the back, from the horns James Webbs' Very Superior Ashes. to the tail. Usually two applications are sufficient. Hens should always have ashes to wallow in. They keey off insects.
