There are many advantages secured by this improvement, some of which may be

briefly stated; all of which may be fully substantiated by prominent farmers of this 1. The apparatus can be set to any depth, 2. The drill will sow at that depth in hard, soft or uneven ground. 3. It lightens the draft of the drill.

4. It packs the earth around the seed, ridges raised by the drill-teeth. 5. It covers grass seed just enough 6. It gives all the advantages of broadeast sowing without its waste of seed. 7. It prevents the clogging of the drillteeth by long manure or grass. 8. The teeth run steadier and do not ump out of or into the ground as they do Gentlemen, Take Notice.
