who runs may read the lesson of the The old favorites too -- the ness goes. in the Eleventh Michigan district. which in 1884 gave the Republican of foreign and American looms. orated. candidate for Congress a majority of 7,475 votes, that the official count may be necessary to determine the results. The district is composed of the fifteen most northerly counties, of the Peninsula of Michigan, and was represented by Jay A. Hubbell, of civil service notoriety. There was no concealment by the Democrats of their determination to carry this Republican stronghold upon the policy of President Cleveland's tariff message. On the part of the Republicans of Michigan there was equal determination to preserve a district the loss of which would not only seriously diminish there political prestige but deprive them of their majority in the Michigan delegation in Congress. In its moral aspects the result is a decided victory for the Democrats, even though the Republican candidate, Seymour, may have pulled through with a handful of votes.

4.0. Some Figures in Presidential Politics. The Democratic National Convention will have a very plain politicoarithmethical problem to figure out. All its discussions, its propositions, its platform, its nominations, the tung Pongee, without dust, at whole tenor of that question in arith- \$5 for a 19 to 20 yard piece, metic. The problem is: How can was never known before in this 201 or more electoral votes be most country. certainly assured from the total of 219 in the following States?

The Home Comfort Range.

Your attention is invited the "Home Comfort" range, manufactured by the Wrought Iron Range Company, of St. Louis, Mo., the salesmen of which Company are now traveling in this county and exhibiting to the residents their ranges and displaying the superiority of the "Home Comfort" Range to the common cast stove. One of the advanges that this range has over the cast range is that it is made from wrought and malleable iron, not one ounce of cast being in it, and, therefore, our readers can readily see that cannot be broken. It is so braced in its construction that a fire, no matter how hot, cannot warp it. Another great advantage the "Home Comfort" has is that the smoke has seven feet to go before it can enter the pipe, thus allowing no heat to escape. A common thread cord tied around the stove pipe will remain there for months, and in fact until it is taken off, for the pipe never gets hot enough to burn it. From these in fact until it is taken off, for the pipe never gets hot enough to burn it. From these Dress-cloths, Kerseys, Flannels, Hosieries, Merino and Wolo Rocking chairs, very facts, it takes but one half of the fuel, generally required to run a stove to supply this range. The oven of this remarkable range is so constructed that when the door is Underwear for children, ladies and gentlemen. Also Fine closed the oven is rendered air-tight, and, therefore, none of the hot air escaping, things placed there to cook must necessarily get done sooner than in a stove where the hot air and coarse Shoes and a Large stock of Hats and Caps. is constantly going out and the cold going in. A tank is placed at the side of the Best French Sateen, 37½c. Coat Linings, Over coats, Ov wood or coal can be used with the same results. The fixtures attending the range are at moderate prices. Terms cash, or all kinds of trade taken at Window shades any damage to them. We cannot enumerate all the advantages of this range, but the higest prices. Very Respectfully, most of you will be called on by the salesmen and then you will be enabled to judge for vourselves. We respectfully refer you to a few of the leading citizens of Talbot and Caroline counties. Md., who are using our ranges and can testify to their merits: Talbot-B. B. Butler, ex-Commissioner, J. E. McDaniel, ex-Commissioner, Henry Wilson, ex-
