### EDITORIAL NOTES.

All that has so far been done against trust plundering is merely scratching the surface. Not a trust has been forced to reduce its enormous profits, and indeed the cost of living has greatly increased since the so-called trust busting began. Does not this show that the Republican politicians, although making faces at the trusts in public, are secretly allowing them to continue their predatory warfare on the people. If the Republican party really wished to prevent the trusts selling their products cheaper abroad than here, the leaders in Congress would have allowed some sort of tariff revision bill to pass. But all the bills for that purpose have been voted down in committee by a party vote, even the bill to reduce the tariff to 100 per cent. on those articles that are taxed over that enormous percentage. The fact is the trust busting campaign is intended to just scare the trusts and combines enough so they will "come down with the dust." The campaign fund in that way is replenished and the corporations and the Republican leaders are combined for a new lease of life. That pleasant Best pastime is rather expensive for the people for all they buy has advanced on an average 47 per cent. since the present tariff law was enacted.

The merciful man is merciful to his beast, and he is especially merciful in the hot weather, which, with its work and worry, brings pains and penalties enough of its won without the addition of gratuitous ones in the shape of over driving and lashing.
