This is the earliest high-yielding variety of Yellow Dent Corn that has yet been produced. I have been breeding this variety since 1893, and the average yield per acre has steadily increased until last year my entire cultivation produced an average yield of 85 1-2 bushels of shelled corn per acre, and matured fully two weeks earlier than other high-yielding varieties. Never have I had better seed corn than I have today. The germination is as perfect as it is possible

to get corn to grow. Write for free circular, giving prices and my methods of corn breeding.
