Bel Air, Md., September 2, 1887. DEER CREEK FARMERS' CLUB The Deer Creek Farmers' Club met last Satu

Wheat Growing and Buying Fertilizers The subject announced for discussion was as follows: "Under existing circumstances is a farmer justified in sowing his usual acreage of wheat and buying as large a quantity of fertilizers as heretofore?"

R. Harris Archer said that under the system of farming pursued here he would answer the question the efficiency of the proprietors, stating at the same time that you are from Harford county, and you will receive a ticket, which you should have registered at the desk. Messrs. Rosenfeld Bros. are manufacturers and sell the most durable, the best style and the lowest price fine ready-made clothing in Baltimore. Their clothing is genuine; the seal-skin coats are genuine, and the locky winners will be pressed, but we don't know what the price may genuinely selected by lot, impartially. be a year hence. In order to get grass we must as we did a year ago. If we can raise from 25 to 30 bushels of wheat to the acre it will pay even if the price is low. Mr. Archer thought the shortage in the wheat crop this year in this neigh-borhood, is due, in some degree, to the fact that it was not put in at the proper time or not put in properly. Some crops are good but most of the wheat is very poor in quality. Wm. B. Hopkins remarked that he is inclined to follow his usual practice, although the crop was failure this year, and will put in as much or a

wheat is not good is that some of it was not p in properly and was sowed late. One of his fields, sowed from the 20th to 25th of September. vielded 30 bushels to the acre. Hargraves Spalding thought farmers better fo low their usual custom and put in as much wheat and use as much fertilizer as usual.

Thomas Lochary said that the fact that prices

much pains cannot be taken with the wheat crop. Some wheat, last year, was two weeks later coming up in some parts of his field than in as much wheat or not, he finds that farmers genamount of corn ground will be planted but not more than one-half as much fallow ground will be plowed for wheat. He has followed wheat should plow down more vegetable matter, clover, for instance. In many places wheat is grown cheaper than it is in Harford. In Kent county as much can be produced with an application of South Carolina Rock alone as with the highest priced fertilizers. He is putting in his usual

amount of wheat and in trying to raise more bushels to the acre. He had found kainit and salt very valuable fertil zers for wheat. He had never missed a crop of wheat when he used them. tember and his father from the 28th of September to the 15th of October, and his father had twice as large a yield as he had. Both crops were put in well. He always plows his stalk ground it again. Instead of decreasing his acreage of much in demand as it was a week ago. little more fertilizer and try it again.

Wm. D. Lee did not think it profitable to raise wheat at present prices. He can make more by pisturing his land than by plowing it for wheat. The first wheat he sowed last fail, about 16th of ground wheat, sowed from 1st to 10th October.

Geo. J. Finney said wheat don't pay but he is sowing a little because he don't know what else | Fultz Wheat.....
to do. If prices do not increase he will change | Longberry Wheat..... his system of farming. This year he raised is bushels to the acre, and it netted bim only 75 cents per bushel. The only way to get a good crop of grass is to fertilize the wheat heavily.

R John Rogers did not see how a farmer can afford to do without sowing wheat. He should not be discouraged by a failure in the crop and low prices this year. It would be bad policy to fertilize less liberally, but we had better try to make a crop, if possible, by using more fertilizers. Some poor crops this year may be attributed to bad farming, but the general failure was from causes beyond the control of the farmer. He had obtained as good results in raising wheat with South Carolina Rock as with bone.

Jas. W. Hanna said it is necessary to sow wheat in order to get land back in grass. The price is low and there is very little profit in it but we should sow as much as we need and fertilize heavily. It is always best to prepare the ground for the general tension of the farmer of the general failure was from causes beyond the control of the farmer. He had obtained as good results in raising wheat with South Carolina Rock as with bone.

Jas. W. Hanna said it is necessary to sow wheat in order to get land back in grass. The price is low and there is very little profit in it but we should sow as much as we need and fertilize heavily. It is always best to prepare the ground his system of farming. This year he raised 18 | White Corn heavily. It is always best to prepare the ground well and fertilize liberally. He considers from

00 to 600 lbs. of bone and phosphate per acre a good dessing, and would prefer to sow one-half it broadcast and drill the remainder in with S. M. Lee said that if a farmer is plowing up his land and sowing wheat with a view to profit from the crop, after deducting expenses, it might possibly be necessary to curtail the crop a little. But in growing wheat in the general course of farming a farmer should, if possible, hold a steady hand and go on as usual. On many farms too much wheat is sowed for their size, but we must sow a certain amount. He thought the poor quality of wheat this year is due more to climatic influences than to bad farming. He had known a few days' difference in sowing to make a material difference in two crops of wheat on the same farm, by some influence of the season which the farmer can not control nor foresee. which the farmer can not control nor foresee. The Hessian fly sometimes ruins a field sowed

Mr. Finney remarked that he had tried that B

My vacation began on Saturday last, when I wisited the U. S. Mint in Philadelphia, a truly awonderful place. Figures, as a rule, are not pleasant reading, or I might give you the number of gold and silver dollars made in a day, of the Position wanted in Harford by a Teacher a general description. The building, situated of six years' experience. Best of references near the great City Hall, between Market and given. E. P. Winemiller, Rinely, York Co., Pa. Chestnut streets, has a massive, squatty appearance, and is built of granite. The walls are of wonderful thickness, every pregaution having been taken to insure perfect security from the Homestead Farm, by Wm. H. Jones, near Bel many There is but one public entrance, which is from Chestnut street. Ascending a dozen granite steps I was brought face to face with a man in ber, at Bush, on Thursday, August 18th, a Sil-"Want to see the mint?" said he, to which I replied, "That's what I do." A dozen persons were waiting in a kind of ante-room, and in a few minutes we were requested to follow, the one-He stopped before some pigs of silver, giving the number of pigs to the ton, the value of each pig, which was one thousand dollars. workmen perspiring at every pore. The molten silver shone like quicksilver as it poured its liquid beauty here and there at the will of the

the lady single?"

This raised a titter. Soon we came to an abrupt halt, when our leader began a little song about selling each visiter a book with a full description of the Mint. He was very importunate, and, thinks I, "There are more ways than one of mak-Returning from the city, I was shocked by a telegram announcing the death of Mrs. Kate J. On Monday I dove through a portion of Cecil county. The corn, as a rule, looks well, and all the crops are promising, if I may except the apple crop, which is very short every place I have visited. Away out over the hills we halted at a little brick church, hitched our horse and wandered among the snowy slabs that mark the restingplaces of many a weary pilgrim, waiting the places of many a weary pilgrim, waiting the first summers.

HENRY FULFORD, Agent, SYMINGTON'S

BEL AIR, Md. Real Estate and Personal Property, Read these Testimonials from First-The Hessian fly sometimes ruins a field sowed early and at other times the late wheat Suffers most. The most successful wheat raisers, he has observed, sow from the list to the 5th of October. Jacob Shertzer said he would decrease his acrewould prepare the ground as usual and sow as soon as he could thereafter. If the fly appeared would purtail the stock he could on the field he would purtail the stock he could on the field and let them eat it down to the ground and kill he fly.

Mr. Finney remarked that he had tried that the first substance of the stand of the stand flower seed, was higher and standing the first substant flower seed, was higher and standing the first substant flower seed, was higher and standing the first substant flower seed, was higher and standing the first substant flower seed, was higher and standing the first substant flower seed, was higher and standing the first substant flower seed, was higher and standing the first substant flower seed, was higher and standing the first substant flower seed, was higher and standing the first substant flower seed of woolens; three the late wheat suffers and perfect fit guaranteed, or money refunded.

The very central location of Harford County.

By authority of a power contained in the last of the subscriber, as Execution, on the premise of county, deceased, the subscriber, and perfect fit guaranteed, or money refunded.

Write for Catalogues, Self measure for thice stock of wheat to the acre, and perfect fit guaranteed, or money refunded.

Write for Catalogues, Self measure for subscriber, as Execution, on the premise of wheat stock of wheat to the acre, and the stock of wheat to the stock of wheat to the acre, and the stock of wheat to the stock of wheat to the acre, and the stock of wheat to the stock of wheat to the acre, and the stock of wheat to the acre with the stock of wheat to the stock of w where Symington's was applied the wheat, when I sowed my clover seed, was higher and standing better than the other. I have advised my neigh-

and is the same land described in a deed from Henry W. Archer, Trustee, to Miles Crow, dated December 3d, 1879, and is recorded in Liber A. L. J., No. 49, folio 194, one of the Land Record Books of Harford county.

The improve

cellar thoroughly fitted up with stalls for horses and cattle, and running water in the barnyard. Spring and excellent Spring House near kitchen door. The upper stories of the spring house and Chicken House and other necessary Outbuildings.

The land is well fenced and watered, and in a high state of cultivation, and very productive About 50 acres are in heavy Chestnut and Which Oak timber, the remainder is nearly all in clover and timothy sod, and is splendidly adapted to grazing. There is also a good Apple Orchard with fruits of all kinds.

The social features of the neighborhood are unsurpassed. Schools, Churches, Mills, Post-office and Store in sight. This property should be seen to be properly appreciated.

And at the same place and immediately acres.

The good acres are indeavy Chestnut and Which Gak timber, the remainder is nearly all in clover and a much less satisfactory stand."

Finksburg, Md.—B. F. McGlone writes: "I used your Ammoniated Bone on wheat and am delighted. Never got better results from any fertilizer ever used. The good effect on the after growth of grass and clover also very marked."

Union Bridge, Md.—John Clemson reports: "I have used nearly every well-known brand sold in the country now text the country near text the country near text the country of the property and bridge the country and having now text the country of the property and the country of the country

-Thos. Martin tried Bone and Potash on wheat, side by side with Whitelock's and E. Frank Coe's, side by side with Whitelock's and E. Frank Coe's, and got better results.
