Twenty-four years ago Dr. Alexis Carrel, a wizard of experimental surgery, set it going in the glass bulb in which it now lies. Swishing pumps supply it with a steady stream of a red fluid compounded in the laboratory to provide nutrition. Drains carry away its waste products as fast as they are formed. Each week a portion of the flesh must be cut away, or else it would long since have outgrown its glassy home. Scientists have calculated that, had it been permitted to enlarge indefinitely at its regular rate, it would by this time have covered

the earth. On January 17, 1912, Doctor Carhad taught him the kind of nutrient fluid it needed for perpetual life.

This substance, made of chemicals and gases and some of the constituents of blood, looks like watery mercurochrome. The bit of heart is as it would had it been part of a because I like to play." real, living chicken.

It still acts the same way, inpumps supply it with the necessary fluid.-Literary Digest.

Useful Device

A new electrical instrument for motor cars constantly indicates the number of miles being traveled per gallon of gasoline. Thus it shows, under known driving conditions, when the efficiency of the car is affected and its cost of operation increased by mechanical impairments.-Col-

TARMERS everywhere are enthusiastic in their praises of the Firestone Ground Grip Tire - they say it's the greatest traction tire ever built, and so economical. How was it possible for Firestone to build such a remarkable tire? Firestone patented construction features are the answer. Gum-Dipping, a process that soaks every cotton fiber in every cord with pure liquid rubber, prevents internal friction and heat and gives the cord body greater strength to withstand the stresses and strains of heavy pulling at low air pressures.

The patented feature of two extra layers of Gum-Dipped cords under the tread locks the massive super traction tread securely to the body of the tire. This patented Ground Grip tread is made wider, heavier and deeper, with scientific spacing between the bars so that the tire is self-cleaning, yet rides smoothly on improved roads. These patented construction features are used only in Firestone Tires. This is why you get greatest traction, longest life and outstanding performance in Ground Grip Tires. They are the best investment a

farmer can make. Equip your car, truck, tractor and farm implements with new Firestone Ground Grip Tires and save yourself time, money and hard work. See this remarkable tire at your nearby Firestone Auto Supply and Service Store, at your Tire Dealer, or at your Implement Dealer.
