THE LIME FOR CORN RECORDS

In 1935, in Queen Anne's County, a well known farmer of the Second District grew sixty bushels of CORN per acre average on his whole field, with

"LI-MA"

No other plant food was used. He never grew that much corn before. Li-Ma is the purest form of agricultural lime. Therefore, you get much more lime for your money. Li-Ma is the only lime made that can be sown with a grain drill, as well as with a lime spreader. Use Li-Ma this year for corn, tomatoes, sweet corn, soy beans, all grass crops, cantaloupes and truck crops.

WITH THE SPRAY

"Where it took us 6 days to cover the orchard, we now do it in 4 days" writes this owner in praise of his "Caterpillar" Diesel RD4 Tractor which is one of a fleet of five "Caterpillar" track-type Tractors.

He adds further, "We have operated these tractors for practically 72 hours at a stretch, with only time out to change oil and refill our sprayers. We operate power take-off sprayers on 8c worth of Diesel fuel per hour. We feel that as far as tractors go, the 'Caterpiller' Diesel is way ahead of anything we have seen in operation."

Would you like to learn what other owners say about >> their "Caterpillar" track-type Tractors? Ask us.

RENT A ROOM There are only two reasons why any room is vacant—either it's not worth

the rent asked, or people do not know that it is for rent. Either way, you as the owner, suffer a loss of revenue. But, if the rent is just, then let a Record-Observer Classified Ad find a tenant for you.

Suppose YOU were looking for a room-what would you do? Undoubtedly you would start out in buying a copy of the Queen Anne's-Record-Observer (if you were not already one of our 3,000 subscribers) and see just what rooms were advertised. That's what most people do, so if you want to rent your room, call CENTREVILLE NO. 1 and a courteous ad-taker will help you write a brief, informative ad.
