COMMUNICATION.

AMONG many new inventions of our enlightened age, is a patent Thrashing Machine, which we have heard highly recommended by our neighboring farmers, invented by Dr. G. Clark, residing in Green street, Philadelphia; and which we had the satisfaction to see in complete operation yesterday near this city, moved by one horse with great ease, thrashing at the rate of nearly one bushel of wheat per minute, perfectly clean, taking off nearly every white cap, without breaking the grain.—It throws the straw very neat from the machine, and leaves it in a good condition for binding. We also witnessed one moved by the power of one man, who informed us he could easily thrash ten bushels per hour, with the assistance of one man to feed it. This small and cheap machine, the price of which we understand is from fifteen to thirty dollars, appears to possess the principle which has been so long sought for—which is in thrashing fast with ease. The beaters are in the form of a coarse screw of wrought iron, and secured in a very permanent manner to the cylinder, which moves with great velocity and ease.—Philadelphia U. S. Gazette.
