THE ELECTION.

The Federalists are crying out that there has been a great gain to their party since last year. In the Legislature then, say they, we according to his views, will render armed had but nine or ten members, and now we have twenty-seven. The spirit which can draw conposed to defend themselves; a score of men, solation from the smallest of things, is a very with this auxiliary power, being competent to comfortable one, and we commend it to their annihilate the largest army which could be col- careful nurture. We hardly can find fint enough in our heart to desire to remove from their sinking hope this last straw to which it has clung. We will not explain to them, with celerity into any situation where horses therefore, the difference between a contested election, and one not contested. If, when they come to their sober senses, they have the smalany desired time, a continuous stream of bul- lest desire to find their gain, let them compare lets, which can be directed towards any point the present returns with those of 32—the last

They will find that in this election, nearly eight thousand more votes were polled than at any preceding contest in the State; and that forward with so much confidence to the moral while in '30 we were beaten by rising one thousand majority; and in '32 elected our ticket by the meagre majority of less than one hundred, this year we have swept through the State, in defiance of every exertion against us; with a clear official majority of twelve hundred and eight .- Trenton Emporium.

LOSS AND GAIN. As we have seen the result of most of the elections which were to take place after the adjournment of the session of Congress, at which time the Bank men alleged that almost the whole country was opposed to the mersures of the government, and would show it by the e'ections, it may be well to review the ground, and notice what we have gamed and what we lose. We begin, therefore, where we have gained a only able Minister which France has had since Mint valuation, at 24 livres, was really worth gained one representative; in Indiana, we have gained one; in Maine we have lost one, but gained a Senator; in Vermont the Bank men have failed to elect two three, and there is a probability of our gaining one at least in Maryland we stand as we were; in Connecticut we stand as we were; in New Jersey the Representatives will stand as they were, and we have gained a Senator; in Rhode Island, the of silver. In 1785, a sixteenth part was deducted | case is doubtful; we have certainly lost nothing, and may have gained a Senator; in Pennsylvare nia we have gained six members; in Chie we cious metals, as fixed in the French Mint, has stand as we were; in Georgia we have gained more nearly corresponded with the proportion gained six members, and South Carolina we have gained two. The matter therefore stands in point of gain, in the House of Representatives, Louisiana one, Indiana one, Pennsylvania six, Georga six, South Carolina two, and mense. It has introduced into extensive & gen- probably one in Vermont, making together 17, from which deducting the loss of one in Maine, leaves us a gain of sixteen members, which makes a difference in the vote of the House, of thirty-two in favor of the administration. timates the whole metallic circulating medium the Senate our gains are one in Maine, one in France, was about five hundred & twenty- Rhode Island, one in New Jersey, no doubt one in Virginia and one in Mississippi, in all stood. It was more difficult to overcome his appetite for raw firsh, than to learn him to speak.

The love of the excitement of alcohol seems to be another common appetite of the man of nable another common appetite of the man of nable ture, for he soon manifested an unconquerable ture, for he soon manifested an unconquerable and solventy in the same danger, so, for aught we know or care, he may fancy that the splinter-speak.
