It will, no doubt, be conceded on all hands, that the result of the late election in this State, was owing, in a great measure, to the want of a more general dissemination of information among the People. Our opponents have had every advantage in this respect. More than two-thirds of the papers in this State, and i this City, two of them open and avowed enemies, and two others, while professing weutrality, were evidently hostile to the principles of the Administration, were arrayed against us. Still we battled with them all, and if we were not victorious, it was owing to the want of a more general circulation of information among the People, than to the want of energy on our bing and of discontinuing—and also of paying, pay in advance will be charged two dollars and mit our sheet to the good sense and liberality Farmer and Gardener. of the public, hoping that they will see the necessity of encouraging us in our undertaking, as well for the interest of the party generally
