OPINIONS OF THE PRESIDENT. On the proceedings of the Court of Inquiry ordered to investigate the causes of the delay

in the campaign against the Creek Indians. The President has carefully examined the proceedings of the Court of Inquiry recently held at the city of Frederick, by virtue of Orders Nos. 65 and 68, so far as the same relate

Alahama against the hostile Creek Indians, in the year 1836, and into every subject connectthe same to report the facts, together with its epinion on the whole subject, for the informa-

tion of the President." It appears from the proceedings, that, after the testimony of nine witnesses had been received by the Court, and after more than one hundred documents, bearing on the subject. on the subject, the Court proceeded to pro-

nounce its opinion, as follows: "Upon a careful examination of the abundant testimony taken in the foregoing case, the practicable to have avoided, was made by at appears that he took the earliest measures to provide arms, munitions, and provisions for destitute; and as soon as arms could be put inbody of the enemy as soon as equipped for offensive operations.

"From the testimeny of the Governor of nary and inexplicable on the part of Major interests. General Jesup, in reference to the character

the contrary, the facts are left . to be gathered from the oral and documentary evidence contained in the proceedings and thus a most important part of the duty assigned to the Court remains unexecuted. Had the Court satisfaction by the evidence before it the President, on comparing such state of facts found by the Court with its opinions, would have distinctly understood the views entertained by the Court in respect to the degree of promptitude and energy which ought to be displayed in a campaign against. Indians; a point marifestly indispensable to a correct appreciation of the epinion, and one which the President's examination of the evidence has not supplied, nasmuch as he has no means of knowing whether the conclusions drawn by him from the evidence agree with those of the Court.

The opinion of the Court is also argumen'ative, and wanting in requisite precision, inusmuch as it states that "no delay, which it was practicable to have avoided, was made by Major General Scott, in opening the campaign against ed, when it occurred, how long it continued, Court found a state of facts, as required by the order constituting it, the uncertainty now existing in this part of the opinion would have been obviated, and the justice of the opinion

itself readily determined. The part of the opinion of the Court which animadverts on the letter addressed by Major General Jesup to F. P. Blair, Esq. bearing date 20th of June, 1836, and which presents the same as a subject demanding investigation, apears to the President to be wholly unauthorused by the order constituting the Court, and y which its jurisdiction was confined to an inquiry into the causes of the delay in opening and prosecuting the campaign against the bostile Creeks, and into such subjects as were onnected with the military operations in that sampaign. The causes of the recall of Major General Scott from the command, and the propriety or impropriety of the conduct of The Court itself appears to have Times. been of this opinion, masmuch as no notice was given to General Jesup of the pendency

altri un of the evidence; and from the same, celestial phenomena.
