HE subscriber having made arrangements for disposing of the valuable shell marl, gers to any part of the Peninsula. which exists on his estate in Talbot County informs the Agricultural community, that he is now ready to deliver, of the above article, any quantity that may be required, by giving him timely notice. The Marl may be taken from the banks at

the price of one cent per bushel cash. contains from 2 to 4 times the quantity of lime to persons. that is contained in the best English Marl -Those wishing to purchase will please address William B. Smyth, Easton, Md. Vessels going for it will pass up the Great Choptank until the Dover Bridge appears in sight—they will then come to Barker's landing where they will find the lands of the undersigned on the FITHE partnership heretofore existing unwest bank of the river.

WILLIAM B. SMYTH. April 10, 1838 The following is an extract from the report of the Geologist appointed by the state of Maryland to make a minute geological survey of the State.

But perhaps the most valuable beds of shell mart in this part of Talbot county, in as much as they may be made extensively available to the public demands for the article, are those which were fully described in the preceeding report, They occur three miles below Dover bridge, forming the high bank from fifteen to twenty feet above tide, being one compact mass of tossil shells, and extending nearly a mile along the river, on the farms of the late Col. Smyth and Mr. Atkison. These beds are in contiguous strata, apparently successive and cosist of vast accumulations principally, in the ascending order, of oysters succeeded clam shells intermixed with other marine shelis, scallop, clam and scallop and uppermost principally of scallop. Endeavour was made to bring these beds into notice, with a TOTHE PUBLIC. view of enlisting them into public service, by giving to their proprietors what was deemed proper directions for extracting the materials and salutary advice as to a just estimate of its value in order to secure a constant and per-manent disposal of it. The subject is now and long established Tavern stand in Easton equal to that of any horse in our country. A in progress of experiment. South of these banks on the Choptank, no other deposite of marl is known to occur.
