Important to Farmers. A NEW AND IMPROVED PORTA-BLE HORSE POWER AND

Having obtained Letters Patent, bearing date February 6th 1838, for an improvement on a PORTABLE HORSE POWER, for County-Queenstown and Centreville, in propelling Threshing Machines, Clover Mill, Small Grist Mills, &c.

The subscriber takes this method of informing the public, that he will be prepared to supply all orders at the shortest notice. The superiority over other machines, consist in ease of operation, durability and simplicity. Being constructed principally of iron, both Horse Power and Thresher, the bearings been surrounded with oil cups, which retain oil sufficient for one day, without replenishing, supercedes the necessity of hourly application of oil which renders other machinery so liable to injury from neglect, and bazardous to those who may superintend them, consequently produced by applying oil, during the operation or from a neglect of its mechanical construction. The vertical and horizontal bearings are sup- other week, and the balance of the time in plied with oil by nutrition and capillary which is a great saving of oil, and prevents them from being dry and injuring the machine, which is so detrimental to other machinery. The Horse Power occupies the space of 3 feet by 3 feet 6 inches, which contains the moving machinery. This machine will thresh all kinds of grain, it also answers the purpose of cleaning clover seed, and with my late improvement is far superior to my former machines.

This machine can be transported in a common cart or wagon, without any inconvenience. A further description is deemed unnecessary, as those who would wish to purchase, will call and examine for themselves. The subscriber has constantly on hand the above described machines, at his manufactory, north of Brandywine village, Del., where orders will be received and the machines sent to any part of the neighboring states. Hundreds of certificates can be produced that it is superior to any thing of the kind they have yet seen.

References to the superiority of this machine may be had in the surrounding counties of Philadelphia, Montgomery, Delaware, Chester and Lamcaster, Pa.; New Castle, Kent and Sussex, Del.; and Cecil, Kent and Harford, Md.; Salem, Cumberland, Gloucester and Burlington, N. J .- Wm. H. Curtis, Agent Easton, Md.; where these machines have been justly celebrated and given entire satisfaction. JESSE URMY

June 5, 1838. P. S .- Corn shellers made to order of the latest improvement. Also, repairing Horse Power, will be attended to with fidelity and despatch, at his manufactory, north side of the Brandy wine, near Wilmington

WILLIAM B. SMYTH. April 10, 1838 The following is an extract from the report imported by the first Governor Ogle. of the Geologist appointed by the state of Maryland to make a minute geological survey of

But perhaps the most valuable beds of shell in harness. Godolphin, the sire of Sassafras, marl in this part of Talbot county, in as much as they may be made extensively available to the public demands for the article, are those which were fully described in the preceeding report, They occur three miles below Dover bridge, forming the high bank from fifteen to twenty feet above tide, being one compact mass of fossil shells, and extending nearly a mile along the river, on the farms of the late. Col. Smyth and Mr. Atkison. These beds are in contiguous strata, apparently successive and cosist of vast accumulations principally, in the ascending order, of oysters succeeded by clam shells intermixed with other marine shells, scallop, clam and scallop and uppermost principally of scallop. Endeayour was made to bring these beds into notice, with a view of enlisting them into public service, by giving to their proprietors what was deemed proper directions for extracting the materials and salutary advice as to a just estimate of its vaue in order to secure a constant and permanent disposal of it. The subject is now n progress of experiment. South of these
