ITALIAN SPRING WHEAT .- As some in the full enfidence of the community, and afford this vicinity, who have sown this article, will probably satisfy them as to the cause. "ROME N. R., May 14, 1838 .- 1 took, a

lew days since, a sample of wheat from the mill, (it was Italian.) and divided it into three The following is a list of the Banks that parcels; one I sowed without preparation-one I sosked twelve hours in brine, and sowed it -the other I soaked twenty-four bours in brine, and sowed,—all of them in a warm place, summer heat; the first in five days was found fully sprouted and rooted—not a grain in fifty but was alive and grown; of the other two parcels, not a single grain has or will grow!! I intend to make further trial, and shall soak other parcels, from one to ten hours, and endeavor to ascertain for a certainty how long it will bear the brine, and still vegetate. The Italian wheat has a very thin skin, and perhaps the brine will sooner, destroy its vitality than other wheat."
