

	Page.
Toluene, production of, factors affecting	145,
	147, 148, 150, 151, 160
purification of	101, 103
reaction products of	108
relative stability of	106, 107, 116
results of cracking	110, 114, 117-121
use of	100
vapor pressure of	157
yield of, method of controlling	141, 142
Trinitrotoluene, characteristics of	103
isomeric forms of, melting points of	103
manufacture of	100, 101
purification of	103
value of	99, 100
Tubes, experiments with	134, 135, 153, 166
<i>See also</i> Furnace, multiple-tube.	
bulging of	190
cost of	190
cracking of hydrocarbons in	15, 17-19
advantages of	53
objections to	51, 52
cross section of, figure showing	155
lap-welded, use of	190
large, advantages of	52, 53
life of	191, 192
proper sizes of	152, 153
sizes used, tests with	134-166, 197-202
curves showing	138, 144, 145
Turner, C. W., cracking process of	18
Two-phase cracking process, disadvantages	
of	11, 12, 50

U.

United States, by-product coke industry in ..	23
consumption of dyestuffs in	21
exports of burning oil from	2, 3
exports of motor fuels from	3
need of toluene in	24, 25
production of coal-tar products in	23
production of petroleum in	IV, 2
