Steamer Tivoli Destroyed By Fire

The steamship Tivoli, of the Baltimore, Chesapeake and Atlantic, Maryland. Delaware and Virginia Line plying between Baltimore, Snow Hill and Crisfield, was burned to the water's edge early last Friday night several miles below Thomas' Point, about 50 miles from

At least two lives were lost and four persons are missing. More than 80 persons, including many wo hen and chil dren were saved. The dead are: Mrs. Thomas Bowden, of Chrisfield, and an unidentified colored woman. The missing: Virginia and William Heward, children of Capt. Richard Heward; Ed. Vogel, and Edward Murray, fireman.

The death of Mrs. Bowden, which resulted within 15 minutes after the fire burst over the steamer, was due to her weakened condition. She was returning to her home in Crisfield from a Baltimore hospital. ----

Hicks' Forecasts For December

The first regular storm period is central on the 3rd, its disturbing forces lasting from the 1st to the 6th, inclusive. The Mercury period projects at least half way through the regular Vulcan period. The Mars period is, of course, continued in full strength, The Moon is in conjunction with Earth and Sun, and also in perigee on the 6th. Threatening, Mercurial conditions will, most likely, last throughout this period. The New Moon in perigee on the 7th, will tend to a prolongation of such weather, holding barometic pressure below normal, and keeping back poreal change until after that date. A sudden and intense cold

wave is n w probable, attended by buz z rdous puffs of wind and snow, immeuiately on the heels of this storm center The first reactionary storm period is central on and touching the 9th and 10th. The December solstice period will make itself felt at this time, and boreal storms of wind and snow will begin to rush out of the polar regions "in good shape" From this period, to the | end of December and into . lanuary, 1916, look for marked winter storms and

The second regular storm period conjoins its centre with that of the Earth's winter solstice period on the 15th. It extends from about the 12th to the 18th, inclusive. About this time the Earth's north pole, and hence its northern hem-Isphere, is turned at widest angle away from the Sun and into frigid outer space. The south pole and its hemisphere is at the opposite storm and weather breeding position, in its relation to the Sun and the influences that lie outside the Solar

The second reactionary storm period is central on the 20th, 21st and 22ad. These are critical days, at the turning crisis of the winter solstice. The Venus period is nearing its center, the Mars influence stil holds, and the Moon is in opposition to Earth and Sun on the 21st -the shortest day of the year. On and touching Monday, Tuesday and Wednesday, the 20th, 31st and 22nd, a storm center, one or more, will pass from west to east across the country. This means—a low and falling barometer, increase in temperature, cloudiness and rain and snow.

The third regular storm period is ceutral on the 26th, extending from the 24th to the 29th inclusive. Added to this regular Vulcan period, the Venus period is central on the 28th, the Moon is on the celestial equator on the 27th and at last quarter on the 29th. The Mars period will be closing about this time. The barometer will give notice in all western sections by the 24th to 25th, of growing storm conditions, and from about Saturday, the 25th, to Tuesday the 28 h. marked and intense midwinter storms will visit all sections of the country in their progress eastward. On and about the 27th these storms wiil be attended with winter lightning and thunder, especially in southern sections.
