DAIRY FACTS

AMPLE COLD STORAGE SPACE

Survey Shows That 160 Warehouses Have Room for 190,000,000 Pounds of Butter.

The bureau of markets, United States department of agriculture, has just completed a survey of the space available for the storage of butter in the cold storages throughout the United States for the present season.

Reports have been received from approximately 160 warehouses. They show that during the month of June they had space available for the carrying of 141,700,000 pounds, and that during July they expected to have additional space sufficient to store 49,700,000 pounds. Of this amount, space

Butter in Cold Storage—There is Evidently a Surplus Space in Warehouses This Year.

sufficient for the storage of 15,800,000 pounds had been contracted for before June 15.

During the month of June, in 1919, these same warehouses increased their holdings by 45,500,000 pounds and during July by 27,000,000 pounds, and their total holdings on August 1 were 95,200,000 pounds. The total holdings reported from all warehouses on September 1, 1919, amounted to a little more than 131,000,000 and the holdings of that date were the largest on record.

As 160 warehouses have sufficient space this year for the storage of more than 190,000,000 pounds, there will evidently be quite a surplus of space.

SELECTION OF DAIRY BULLS

Look for Heavy Production in Ancestors—Conformation of Hind Quarters Good Index.

As a large number of cows will be bred during the winter months, many farmers will be interested at this time in the purchase of a herd sire. Unfortunately, there seems to be a sort of prejudice against the mature bull. No sooner has he attained an age sufficient to demonstrate his value as a sire, than he is handed over to the butcher and his place is taken by a young animal of unknown quality.

There are several good reasons why this practice should not be followed. In the first place the progeny is apt to lack vigor. Further, a frequent changing of sires is likely to produce a lack of uniformity in type and distinctive peculiarities that should characterize the good dairy herd. Against this, it is sometimes urged that old bulls become vicious and hard to handle. Doubtless, there are occasional grounds for this objection. In most cases, however, this might be overcome by allowing the animal plenty of exercise.

AVERAGE VALUE OF HEIFERS

Those Sired by Purebred Bull Worth Considerably More Than Those by Inferior Sires.

The heifers sired by a purebred dairy bull are worth considerably more than those sired by a grade or scrub bull. Some definite figures on this subject have been obtained by the University of Illinois in a dairy survey made on 577 farms in 1912. It was found that the average cash value of all the heifers sired by a purebred bull was \$41, while those sired by a grade bull was \$32, and those sired by a scrub bull only \$30. On the other hand, the average value of the purebred bulls used was \$82 and the average value of the scrub and grade bulls was \$45.

COWS REQUIRE FRESH WATER

Low Milk Flow Will Result if Animals Are Compelled to Drink From Polluted Ponds.

Good water should be provided at all times. Cows should not be forced to drink stale and polluted water from ponds and marshes. When this is the case their demands are not supplied and a low milk flow will be the result, according to R. W. Clark of the Colorado Agriculture college.

Eighty-seven per cent of milk is water and a cow giving five gallons of milk a day would require about thirty-five gallons of water for it alone, besides water for the other requirements of the animal.

Paying the Fiddler

The country is recovering from the effects of its orgy of spending. Extravagance, profiteering and unbridled speculation have brought a burden to all. A cry for economy is heard all over the land. Such conditions have occurred before and will occur again unless checked. In 1874 the Grange adopted its policy of thrift. It declared opposition to excessive salaries, high interest rates and exorbitant profits. It proclaimed the need for the most direct and friendly relations between producers and consumers, that wasteful trade practices might be eliminated.

This program represents the farmer's attitude now—as it did then. The Grange always has adhered to it. It has sought steadfastly to check needless extravagance, both private and public, both individual and governmental.

Our farmers, by reason of sane habits of living, are a great steadying force in the nation. But they need leadership and a common spokesman to widen their influence. The Grange offers you both!

THE COUNTRY GENTLEMAN is in full accord with these principles. It, too, is fighting the farmer's fight. By practical examples it shows how farmers can correct abuses. And it will make you acquainted with up-to-date and profitable farming methods that are being followed all over the country. This, however, is only a part of the help and pleasure you will get in a year's 52 big issues, which now cost only \$1.00. Find out for yourself! Let our secretary care for your order—today!

KENT COUNTY POMONA GRANGE No. 3
 A. L. HARRIS, Secretary, Betterton, Maryland
 W. HOLT WOODALL, Master, Galena, Maryland

Dear Secretary: I'm glad to see the Grange being pushed with good advertising. And here's my dollar for THE COUNTRY GENTLEMAN for a year—52 weekly issues. Please forward my order to the Publishers at Independence Square, Philadelphia, Pa.

DO YOU CATCH COLD EASILY?

Your Vitality is Low—Resistance Weak
YOU NEED PEPTO-MANGAN
 Rich, Red Blood Will Strengthen You and Put You On Your Feet—Able to Resist Colds

Your system normally healthy should never catch cold. Your body is adjusted to take care of sudden changes in the weather.

It is when you are run down and your vitality is low that your body cannot adjust itself. Then you take cold.

If you keep your blood in good condition, with plenty of red corpuscles, you will be strong and your body will easily adjust itself to sudden changes. You will throw off the cold germs that go flying into the air when someone with a cold sneezes.

Red-blooded men, women and children eat well. They have plenty of energy. They go along with a smile because they feel right.

Try Pepto-Mangan, the successful tonic. It is a wonderful blood builder. Take it for awhile till you feel right.

Pepto-Mangan is widely and heartily endorsed by physicians. It is effective and easy to take. It is prepared in both liquid and tablet form. The medicinal properties are the same.

Sold at any drug store. But be sure you get the genuine Pepto-Mangan—"Gude's." Ask for it by name, and be sure the full name, "Gude's Pepto-Mangan," is on the package.
