

THE WOODROW WILSON FOUNDATION FUND

Having been requested by the State Chairman, C. K. Bowie, to act as chairman of the W. Wilson Foundation Fund for Kent County, and having consented to do so, I am making this appeal to all admirers of Mr. Wilson in the county, who wish to contribute to that fund, to do so as soon as possible. The purpose for which the fund is being established is well known to all. Those who wish to honor the greatest living American citizen and to perpetuate his ideals, cannot do so in a more impressive way than by contributing to this fund. We are hoping to raise five hundred dollars in Kent. We are ready to receive larger subscriptions but want at least five hundred dollars or less contribution at once to make it a popular fund. T. G. Wroth is the treasurer. I have requested the following gentlemen to act as collectors in their respective communities:

- Paul Comegys, Millington. E. Thomas Massey, Massey. Robert C. Morgan, Galena. George Sutton, Blacks. John H. Clendaniel, Kennedyville. J. W. Howard, Still Pond. Wroth Stavelly, Lynch. M. Sutton, Bettersom. Benj. F. Rash, Worton. Romie Skirven, Hanesville. Jesse H. Usilton, Melitota. H. S. Startt, Fairlee. Page Gale, Tolchester. W. O. Solby, Rock Hall. Elwood Burgess, Edevelite. Theodore H. Wood, Pomona. S. S. Hepburn, Chairman.

Special to Water Takers

Complaints have been made because we do not give any notice when the water will be cut off. Read and remember this: Hereafter when the water will be cut off the bell at Lyceum Theatre tower will be sounded as follows: strikes 1, 2, 3, 4, 5, then rests for 15 seconds and will then strike as above until 25 taps or five fives are sounded. Next, after 15 minutes the water will be off. Therefore get water for future use. CHESTERTOWN WATER BOARD, 1913-14.

FRUIT TREES AND PLANTS.

Hood's Dependable Fruit Trees and Plants. Send for 1922 catalog at once. Quality Grown Nursery Stock. True to Name—Moderate prices. Our catalog describes in detail our complete stock of fruit and ornamental trees, grape vines and other small fruits, evergreens, hedge plants, roses and other shrubs. W. T. HOOD & CO., (Est. 1896) Dept. 10—3025 Chamberlayne Ave., Richmond, Va.

Rate Schedule P. S. C. No. 9

Rate Schedule No. 9 Made and Filed by Chestertown Electric Light and Power Company

in accordance with Public Service Commission Order No. 246, of April 19th, 1911, described in Circular No. 8A.

The following rates are to become effective as called for by the Maryland Public Service Commission orders No. 6338 and 6445.

Prices are on a monthly basis unless otherwise stated. Town Lighting—32 C. P. street lamps, \$21.00 per year each. Lighting Rates (applicable to all classes of lighting customers except for town lighting, as set forth above): For the first 50 K. W. H. per month 20 cents per K. W. H. For all in excess of 50 K. W. H. per month 19 cents per K. W. H. Discount lighting rates to be subject to a discount of 5 per cent, provided bill is paid within 10 ten days after its date of presentation. Minimum Bill—\$1.25 per month. Power Service—For 110 and 220 volt, single phase, two phase. For 110 volt, single phase, 60 cycle, of one (1) horse power or less: For the first 200 K. W. H. per month 30 cents per K. W. H. For the next 200 K. W. H. per month 25 cents per K. W. H. For the next 200 K. W. H. per month 20 cents per K. W. H.

Raise 'em The FUL-O-PEP Way

The Ful-O-Pep Way of Feeding chicks has raised the old expensive "grain feeding way" and has proven to poultry raisers that the old method of grain feeding is all wrong. The Ful-O-Pep Way of feeding gives you 1 pound of gain at cost of 2 pounds of Feed instead of only 1 pound of gain to each 4 pounds of feed, which is the basis of figuring cost of production arrived at by experiment stations covering several years experiments with grain feeding. Why continue to feed this old expensive way when the Ful-O-Pep Way will give you the same gains with only half the feed?

FUL-O-PEP GROWING MASH Cost Less Per Pounds of Gain Made than Any Other Feed

The Ful-O-Pep Way consists of feeding Ful-O-Pep Growing Mash from the very start—continuously keeping it before your birds all the time. Ful-O-Pep Growing Mash, because of the high feeding value of its protein, fish and bone contents gives twice as far as grain feeds—every ounce is digested by chicks delicate digestive organs—there is no waste and when compared with results costs only half as much in pounds of feed consumed. Furthermore, your losses from bowel and digestive troubles that arise from feeding hard indigestible grains will be very much less and your flocks will be of even growth and development. Give the Ful-O-Pep Way a trial this season—it will reduce your feed costs and materially increase your profits.

For Sale by Practically All Dealers Everywhere M. P. BROOKS, CHESTERTOWN, MD.

NOLAND Not Merely Honest

We are not satisfied that you should know this as a merely honest store. It is our constant endeavor to make this a store of high INTEGRITY. To do this means: SERVING THE CUSTOMER'S BEST INTERESTS WHETHER THE CUSTOMER KNOWS IT OR NOT. It means selling satisfactory-giving merchandise at prices that are absolutely fair. And courtesy and service, always. Every day we take up anew the task of making new and retaining old friends and of guarding with honor and rightful pride the reputation for dependability which has earned us our standing with the public.

Today we are loading our shelves with new Spring Goods in all the new and pretty checks and plaids in the best grades of domestic and imported Gingham. With our guarantee you are getting the best money can buy and the very lowest possible price. Along with this go our White Waistings; also Poplins and Swiss in all the leading shades of the season. Just now we are closing out all Winter Underwear at or below cost. This sale on winter wear will close March 1st. Our new Floor Coverings are now arriving and you should visit the new headquarters for MATTINGS, WOOL and FIBRE RUGS, GREX and GRASS RUGS. We are also headquarters for Gold Seal Congoleum Rugs, the guaranteed floor-covering. Now's your chance to buy these most economical and attractive floor-coverings at the new reduced prices. An early visit will give you the benefit.

NOLAND

For all in excess of 500 K. W. H. per month 6 cents per K. W. H. Discount—Power rates to be subject to a discount of 5 per cent, provided bill is paid within ten (10) days after its date of presentation. Minimum Bill—\$1.00 per month per connected horse-power. Power rates are not applicable to customers having a total connected motor load of less than two horse power. Same general rules applied to the rates above as previously filed. Rate Schedule P. S. C. No. 9A.

The following rates are to become effective on and after March 1, 1922; Prices are on a monthly basis unless otherwise stated. Off Peak Summer Power Service—Applicable only to customers whose use of energy is limited to the period commencing on or after March 1 and ending on or before October 31, and whose connected load is ten (10) horse power or more. Rate—The Power Service Rate less a discount of 15 per cent. Minimum Bill—Twelve (\$12) dollars per horse power of connected load. This minimum bill is payable in advance and covers the entire period up to and including October 31. The minimum bill will be applied as a credit to monthly payments made under this rate during the calendar year in which the minimum payment was made. Rules—The general rules now in force are applicable to this rate and in addition thereto the following rules will apply to this rate only. (1st) Customers using this rate must discontinue their service for a period of two hours during the lighting peak whenever they may be required to do so by the company. (2nd) Customers using this rate and who use their service beyond the period specified above will be required to pay immediately to the company an amount of money sufficient to bring all their previous bills for the calendar year up to the charges which would have been made under the Power Rate set forth in Rate Schedule No. 9. This rate is not applicable to lighting service. Breakdown or Standby Service—Power and lighting rates are not applicable to customers having their own source of electric power or who purchase electric energy from outside sources other than this company. For customers of this class the following rates and rules will apply: Lighting Rates—The rates as set forth in schedule P. S. C. No. 9. Power Rates—The rates as set forth in schedule P. S. C. No. 9. Minimum Bill—Applicable to either Power or Lighting Customers. One (\$1.00) dollar per month per ampere at 110 volts single phase. Two (\$2.00) dollars per month per ampere at 110 volts single phase. Two (\$2.00) dollars per month per ampere at 220 volts single phase. Four (\$4.00) dollars per month per ampere at 220 volts single phase.

DAIRY HINTS

CONCRETE OR WOODEN SILOS

Test Made by Department of Agriculture Shows Material Used Cuts No Figure.

(Prepared by the United States Department of Agriculture.) Is silage any better when put up in concrete silos than when it is saved in stave silos? Stave silos are probably the more common kind; they are usually less costly. Many people, however, prefer the more permanent concrete silo because of the greater durability and the fact that the building material may be found near home in many cases; but there is an impression on the part of some people that concrete silos does not give such good results in the preservation of the silage from spoiling and from freezing. Experiments made by the dairy division, United States Department of Agriculture, do not bear out this notion.

In experiments conducted on the dairy division farm, at Beltsville, Md., two silos were used, one concrete and one stave, standing side by side. The concrete silo was directly south of the concrete one, and hence got more sunshine and less north wind. Otherwise they had exactly the same conditions. Temperatures in the two silos were

Concrete and Wooden Silos, Well Constructed.

taken by means of electrical thermometers buried in the silage, which made a record which could be read on the outside. The thermometers were placed 3 inches and 18 inches from the wall and also in the middle of each silo. Three sacks of silage were carefully weighed and buried in each silo at various depths, close to the thermometers; and when the silage was fed down to the cows, their contents were taken out and analyzed. The quality of the silage was judged by its appearance and odor and its palatability to the cows. If much difference had been apparent a feeding trial would have been made to see which lot of silage was better, but the results in the two silos were so nearly alike that it was not thought worth while to make the feeding test. In short, neither the temperatures nor the chemical analysis of the two kinds of silage revealed any marked difference that could be ascribed to the material used in the construction of either silo. Cows ate the silage from both silos with the same avidity. It is concluded, therefore, that farmers may build stave silos or concrete silos, whichever they prefer, without any fear of not getting good silage from either one, if the silage is put up right. It is assumed, of course, that the silo in either case will be properly constructed, with smooth walls, straight up and down, so as to be free from pockets and bulges and properly coated inside with coal tar or some similar preparation; and that the silage will be properly packed, so that all air will be excluded. Silage will not keep in any kind of silo unless packed down and kept airtight.

GOOD PUREBRED BULLS HELP

Breeder Achieves More in Two Generations Than He Can in Five With Grade Silves.

With purebred bulls a breeder achieves more in the improvement of his herd in two generations than he can in five with grade bulls, says the United States Department of Agriculture. Department workers have thoroughly studied the subject of building up herds to better milk, butter and beef production. Better silages may be obtained either by individual purchases or by becoming a member of a bull association. Literature on the latter method can be obtained by writing to the department, and will furnish useful reading during the winter. Full information can also be obtained by consulting your county agent or state agricultural college.

DEHORNING CALVES IS EASY

Rubbing Caustic Potash Around Button of Young Animal Will Prove Efficacious.

Buy stick caustic potash at any drug store. Before the calf is a week old dampen the skin over the horn button, apply vaseline or lard freely to the skin around the buttons, wrap one end of the caustic with strong paper to protect the hand and then rub it upon the button until it is ready to bleed. Be careful to keep the caustic out of the calf's eyes and do not burn skin other than that over the horn button. Milk will keep better and make better products if all pails, strainers, and separator parts are sterilized, says the United States Department of Agriculture. Use live steam for five minutes. If you cannot get live steam, boil in water for five minutes. A simple steam sterilizer for dairy utensils, which can be made by a local tinsmith, is described in Farmers' Bulletin 748, "A Simple Steam Sterilizer for Farm Dairy Utensils." The bulletin may be had on application to the department.

STERILIZATION IS ESSENTIAL

All Pails, Strainers, Separator Parts, Etc., Should Be Steamed for Five Minutes.

Milk will keep better and make better products if all pails, strainers, and separator parts are sterilized, says the United States Department of Agriculture. Use live steam for five minutes. If you cannot get live steam, boil in water for five minutes. A simple steam sterilizer for dairy utensils, which can be made by a local tinsmith, is described in Farmers' Bulletin 748, "A Simple Steam Sterilizer for Farm Dairy Utensils." DAIRY FACTS

COW-TESTING ASSOCIATIONS

Where Organized a Decided Improvement Has Been Noted in Quality of Dairy Herds.

(Prepared by the United States Department of Agriculture.) The practice of testing cows to determine their milk and butter-fat production and feed consumption by means of cow-testing associations has become widespread. There are now 432 associations of this kind in the United States, besides many in foreign countries. In most cases each association has one tester and no more cows than can be well handled, but there are some very large ones and some that are much smaller than the standard. The theoretical number of members in a cow-testing association is 26, which makes one member for the tester to visit each working day of the month. A member of such an association is supposed to have not more than 30 cows, that makes a large day's work. If every member had that number, there would be 780 cows in the association, but few of them, however, are that many. There is no definite relation between the number of members in an association and the number of cows owned. In California there is one association that tests 4,000 cows and another that tests 4,000, and the number of members are, respectively, 46 and 100. Another in the same state has 86 members and only 1,430 cows; there are 12 associations in California with over

Testing Associations Uncover High Producers.

1,000 cows each. Ordinarily the number of cows in an association runs from 300 to 500, the average for the country being 423. The number of herds average 24.8. To have more than one tester is a California practice, and one association in that state has three. In contrast to the large associations in California and a few elsewhere, there are some that are quite small. One in Massachusetts has only 10 members and 123 cows; another in Kansas has 10 members and 85 cows; and in Michigan there is one with 4 herds and only 45 cows. The use of co-operative cow-testing associations has resulted in great improvement in the quality of the dairy cows in the localities where they have been organized by reason of the sifting out of the low producers and the discovery of good cows that might otherwise have been sacrificed. The United States Department of Agriculture collects statistics of all the cow-testing associations and issues a directory of all those that are active on July 1 each year. It also assists in the organization of associations, working through the county agent if there is one in the community.

WISCONSIN FARMER MAKES CONCISE REPORT OF HIS EXPERIENCE TO THE DAIRY DIVISION.

What the cow-testing work has meant to one Wisconsin farmer was stated so simply and concisely in a report to an agent of the dairy division, United States Department of Agriculture, that it is worth passing on to the farmer says: "The cow testing in the west section of Outagamie county has been carried on with marked success. "We have become better acquainted. The man who has been taking good care of his cows has also become better known. "We have learned to know our cows not by what they seemed but by what they actually are, to understand the necessity of selecting better calves from our best cows to raise for our future herd. "We have learned to look on the dairy cow not as a necessary part of our personal property but a real live machine, capable of returning values received plus, and that plus depending largely upon the care, feed, and breeding of the dairy cow."

WILSON FUND SLOWLY GROWS

MARYLAND'S QUOTA OF \$30,000 IS DIVIDED EQUALLY BETWEEN CITY AND THE COUNTIES

The Wilson Fund slowly grows. Maryland's quota of \$30,000 is divided equally between Baltimore City and the Counties. Of the City's \$15,000 there has actually been raised \$6,800, and the Counties have actually raised according to receipts and advices received at Headquarters the sum of \$3,500. Other money has been raised in the counties which Headquarters has not yet been advised by the local chairmen, who are endeavoring to complete their quota before turning in their reports. The work has been greatly delayed by persons who intend to contribute but have failed to send in their contributions to their local chairmen. The work would be greatly aided if those who intend to contribute would notify their local chairman or Headquarters, 1319 Fidelity Building, Baltimore, of the amount of their contribution and the time that it will be convenient for them to pay the same. The standing of the Counties is as follows: Allegheny—Mrs. Robert Henderson, 154 Washington street, Cumberland, Md., \$370.25. Anne Arundel—Mrs. Robert Moss, Annapolis, Md., \$385. Baltimore County—Mrs. Geo. I. Richardson, Lutherville, Md., \$194.50. Calvert—Hon. J. B. Gray, Prince Frederick, Md. Caroline—Dr. M. Bates Stephens, Denton, Md. Cecil—Miss Mary Jamar, Elkton, Maryland. Charles—Hon. W. Mitchell Digges, La Plata, Md. Dorchester—Gov. Emerson C. Harrington, Cambridge, Md. Frederick—Mrs. Andrew Annan, Emmitsburg, Md., \$115. Garrett—Mr. Gilmore S. Hamill, Oakland, Md. Harford—Mr. and Mrs. Edmund Webster, Belair, Md. Howard—Mrs. J. Brooke Clark, Ellicott City, Md., \$100. Kent—Rev. S. S. Hepburn, Worton, Maryland. Montgomery—Mrs. J. H. Jones, Rockville, Md., Mr. Robert Hillton, Rockville, Md., \$58. Prince George's—Mrs. Cleo Marbury, Laurel, Md. (Women's Committee), \$301. Prince George's—Judge T. Van Claggett, Upper Marlboro, Md., \$16. Queen Anne's—Mrs. J. H. C. Legg, Centerville, Md. St. Mary's—Hon. J. Allan Coad, Leonardtown, Md. Somerset—Hon. W. Joshua Miles, Princess Anne, Md., \$500.75. Talbot—Hon. Mason Sheehan, Easton, Md. Washington—Mrs. W. H. Hamilton, Jr., 175 S. Prospect St., Hagerstown, Maryland. Wicomico—Hon. Hooper S. Miles, Salisbury, Md.; Mrs. A. J. Vandenberg, Salisbury, Md., \$500. Worcester—Mr. C. L. Vincent, Snow Hill, Md.

Montgomery—Mrs. J. H. Jones, Rockville, Md., Mr. Robert Hillton, Rockville, Md., \$58. Prince George's—Mrs. Cleo Marbury, Laurel, Md. (Women's Committee), \$301. Prince George's—Judge T. Van Claggett, Upper Marlboro, Md., \$16. Queen Anne's—Mrs. J. H. C. Legg, Centerville, Md. St. Mary's—Hon. J. Allan Coad, Leonardtown, Md. Somerset—Hon. W. Joshua Miles, Princess Anne, Md., \$500.75. Talbot—Hon. Mason Sheehan, Easton, Md. Washington—Mrs. W. H. Hamilton, Jr., 175 S. Prospect St., Hagerstown, Maryland. Wicomico—Hon. Hooper S. Miles, Salisbury, Md.; Mrs. A. J. Vandenberg, Salisbury, Md., \$500. Worcester—Mr. C. L. Vincent, Snow Hill, Md.

The Wilson Fund slowly grows. Maryland's quota of \$30,000 is divided equally between Baltimore City and the Counties. Of the City's \$15,000 there has actually been raised \$6,800, and the Counties have actually raised according to receipts and advices received at Headquarters the sum of \$3,500. Other money has been raised in the counties which Headquarters has not yet been advised by the local chairmen, who are endeavoring to complete their quota before turning in their reports. The work has been greatly delayed by persons who intend to contribute but have failed to send in their contributions to their local chairmen. The work would be greatly aided if those who intend to contribute would notify their local chairman or Headquarters, 1319 Fidelity Building, Baltimore, of the amount of their contribution and the time that it will be convenient for them to pay the same. The standing of the Counties is as follows: Allegheny—Mrs. Robert Henderson, 154 Washington street, Cumberland, Md., \$370.25. Anne Arundel—Mrs. Robert Moss, Annapolis, Md., \$385. Baltimore County—Mrs. Geo. I. Richardson, Lutherville, Md., \$194.50. Calvert—Hon. J. B. Gray, Prince Frederick, Md. Caroline—Dr. M. Bates Stephens, Denton, Md. Cecil—Miss Mary Jamar, Elkton, Maryland. Charles—Hon. W. Mitchell Digges, La Plata, Md. Dorchester—Gov. Emerson C. Harrington, Cambridge, Md. Frederick—Mrs. Andrew Annan, Emmitsburg, Md., \$115. Garrett—Mr. Gilmore S. Hamill, Oakland, Md. Harford—Mr. and Mrs. Edmund Webster, Belair, Md. Howard—Mrs. J. Brooke Clark, Ellicott City, Md., \$100. Kent—Rev. S. S. Hepburn, Worton, Maryland. Montgomery—Mrs. J. H. Jones, Rockville, Md., Mr. Robert Hillton, Rockville, Md., \$58. Prince George's—Mrs. Cleo Marbury, Laurel, Md. (Women's Committee), \$301. Prince George's—Judge T. Van Claggett, Upper Marlboro, Md., \$16. Queen Anne's—Mrs. J. H. C. Legg, Centerville, Md. St. Mary's—Hon. J. Allan Coad, Leonardtown, Md. Somerset—Hon. W. Joshua Miles, Princess Anne, Md., \$500.75.
