### Farmers Are Good Pay, Extensive Holder of Farm Mortgages Says, Citing Infrequent Foreclosures

FERTILIZING  
PHOTO BY UNDERWOOD UNDERWOOD

The farmers who have made use of the Metropolitan Life Insurance Company's farm loan division represent twenty-five states, and the total area on which mortgages are held (approximately 3,750,000 acres), would constitute a plot of land the size of Connecticut and Rhode Island.

These farm investments on December 31, 1923, totaled \$12,344,874.97. Of this amount \$45,313,000 was loaned last year, according to a statement recently issued by Robert Lynn Cox, Second Vice-President, and head of the Metropolitan's farm loan division. The extent of the crop production of 3,750,000 acres (covered under mortgages to Metropolitan Life Insurance Company) is indicated by the fact that if only 20 per cent. of the acreage were put in corn, the annual production, figuring 85 bushels to the acre, at an average price of 65 cents, would make a return of \$25,593,750.00.

RICE GROWING IN ARKANSAS

Loans are made in the best agricultural sections of Iowa, South Dakota, Nebraska, Kansas, Missouri, Oklahoma, Arkansas, Mississippi, Alabama, Georgia, North Carolina, South Carolina and other states, chiefly in the central, northwestern and southwestern territory. Despite widely current reports of the serious situation facing farmers, it is a noticeable fact that Mr. Cox reports only 45 foreclosures pending out of 18,648 mortgages. Only eight farms have been placed in foreclosure in Minnesota and four of these were subsequently reclaimed. According to Mr. Cox, a realization of the economic hope of the American farmer, long deferred, is now in sight. "The farmer," he said, "is getting at last his chance to share largely in bringing about the better economic conditions in the world, and I am sure he will not disappoint those who believe we can look to rural surroundings for the development of our best citizenship."

#### Blight Hurts Tomato Crop

Tomato production on the Eastern Shore, already expected to be below normal as a result of the wet weather and a scarcity of plants, is likely to be reduced still further by an unusually severe epidemic of early blight which is attacking plants in the fields and seriously jeopardizing the crop outlook, according to Dr. R. A. Jehle, plant pathologist for the University of Maryland Extension Service. The disease is very prevalent in Dorchester county, says Dr. Jehle, and is likely to be present in other counties of the Eastern Shore. Its spread has been favored by the wet weather and it is particularly noticeable on plants which were not well sprayed in the plant beds. Early blight attacks the stems and leaves of tomato plants and appears as a sunken brown patch, says Dr. Jehle. The stem becomes weakened where the patches appear and the plants are easily broken.

#### Does It Pay?

GEORGE W. MOORE, of Betterton, took out a policy for \$225 in 1907 in the MUTUAL FIRE INSURANCE CO. of Kent County, Md. In March, 1924, he canceled this policy and was paid \$24.08. He paid in premiums during the 17 years, \$34.00. Thus he got insurance for 17 years for only \$10.

### NEW DIAMOND SULKY CULTIVATOR

This Cultivator has many imitators, but no equals. It has been greatly improved for the coming season and now stands at the head of all Sulky Cultivators without a doubt. It is especially adapted for your section of the country, will work in any class of soil and very easy to operate. The price is far below all others, the repairs are all sold at low prices. Does not require any special cultivator tooth or steel, and many other points you can readily see. It can be used as a Marker, a Coverer, a Hiller, a Fallow Worker and a Cultivator, and all the changes can be made in a few minutes, with no tools but a wrench.

## How Many

think of the old adage. "Waste not, want not," and fail to

## Care For

the possessions they have.

## Your Home

and other buildings frequently need

## Repairs

and improvements which may require only a small expenditure if done when first needed, and which may lead to much larger expenditure if neglected.

Why not look today and see what is needed around your home. In the period between the active spring and active fall building many carpenters are glad to have smaller jobs and we believe you will find it easy to get someone to do the work you may have in mind. In addition, there is the advantage of having your work done in warm weather at the minimum of inconvenience.

Literature with some suggestions which may be helpful will be sent on request.
