SERIES OF GROUP MEETINGS

Public school officials and teachers are interested in the first of a series of group meetings to be held in the Shore counties, which began in the elementary school building Wednesday evening, when pupils of the fifth, sixth and seventh grades repeated a pleasing entertainment consisting of a dramatization of a number of popular books, which was given several months ago under the direction of Mrs. Ella Robinson, English teacher, assisted by Miss Helen Jane Woodley, county supervisor of elementary schools.

Prominent State officials, including Dr. Albert S. Cook, State superintendent of education; Miss I. Jewell Simpson, assistant State superintendent, and Miss Wiedfeld, State supervisor of elementary schools, with official representatives from a number of the Shore counties, and Baltimore and Harford counties, are in attendance and have prominent parts in an interesting program which consumed the entire day on Thursday, and closed at noon on Friday.

The conference was called by State authorities to study and discuss the work of Miss Helen Jane Woodley, Kent county supervisor of elementary schools, which has received favorable comment from State educational authorities because of its excellence. Practically every school in the county was visited on Thursday as far as roads permitted, and Thursday evening was taken up with a discussion of observations made at these visits.

GOOD ROADS MASS MEETING IN COURTHOUSE

John N. Mackall, chairman of the State Roads Commission, will address a mass meeting here next Tuesday night in the Court House, to be held under the auspices of the Kent County Chamber of Commerce to discuss the proposed increase in gasoline tax, which is to be introduced in a bill in the General Assembly.

The proposed measure would boost the present tax to eliminate grade crossings throughout the State and improve lateral roads. Several months ago the county commissioners of the nine Shore counties hit upon a county gas tax plan for lateral road funds, which would have no show if the administration measure is passed. It is also expected Mr. Mackall will discuss the matter of additional State highways in Maryland. It is expected the full membership will attend the meeting. The public are invited.

First Gas Tip

The first gas pipes were gun barrels, soldered together. The lighted gas flared from the end and one day the gas tip developed by accident. Murdock wanted to stop the flow of gas and used his wife's thimble. The top of the thimble was full of holes through which the gas escaped. It gave a much whiter, brighter light this way and the old open flame burner thus came into being.
