A FEW WORDS TO SENSIBLE PEOPLE. AS THE WORLD grows older and the people wiser, there is a growing demand for a better and more perfect quality of goods of all kinds. The people today are not Delmar content with the manner in which their ancestors fertilized their orchards, but are striving to reach the heights of perfection.

THE PEACH IS of Asiatic origin, was introduced in this country in 1635, and in 1796 the yellows made their first appearance near Philadelphia. Subsequently large orchards were planted for profit, then for years fertilized with barnyard manure, but it was found that in this way the orchards abounded in weeds and insect. THEN THEY TRIED a Peach Tree Phosphate in which acid was used to make it available; this was also found detrimental, as several years' application of an

acidulated goods caused the trees to deteriorate, leaves twist up and turn yellow. Thus was seen the necessity of a non-acid goods, and ground bone was resorted to: this was good, but slow in action. FINALLY T. R. Hubbard & Son offered O. B. Guano, a natural bird manure found in the West Indies, and introduced here after their senior's return from that place dyas. in 1882. This goods is the base of their Fruit Grower. In appearance it is like Queen Anne & Kent R. R.-Leave Townsend for old Peruvian. In analysis it runs higher than dissolved animal bone.
