Advances in Science.

It is proposed to employ aluminium for the manufacture of the metal parts of photographic cameras and plate holders, owing

to its extreme lightness. On a recent date there were in New York harbor 532 ocean-going vessels of all kinds, of which 116 were steamers, 37 ships, 101 barks, 23 briggs and 255 schooners.

The average supply of water per person in London last year was about thirty and a Carnot in Paris, the president does not half gallons, an amount considerably less than the consumption per individual the larger cities in the country.

It is probable that the magnificent sidewheel passenger vessels plying on the Long Island Sound will be succeeded by screw boats. One of the lines is having two propellers built, and if they prove successful it is believed that no more side wheelers will be erected for this service.

Owing to the alternate shrinking and swelling of the wooden flumes employed throughout the West for mining and irrigating purposes it is proposed to use galvanized iron flumes, with the upper edges de Lafayette.

The Mexican government proposes to expend over \$4,000,000 in constructing a ico. Jetties will be built, and the contem- journey was abandoned. plated work, which is to be finished in five years and a half, will provide a harbor

capable of receiving the largest vessels. Until last year all the Russian grain transported to the seaboard for export was He is still a lively fellow, and wears the carried in sacks, but the regulations issued by the Minister of Railroad Affairs have resulted in a large part of the grain being now carried in bulk. It formerly required 98,000,000 sacks for use in the Russian

grain trade. The new English war-ship Empress of India, which has just been finished, is the farthest advanced of her class, and is one of the largest battle ships afloat. This vessel is of 14,500 tons displacement and her

engines are of 13,000 horse-power. It is stated to be the intention of the Japanese Government to order from English builders a cruiser of 3,600 tons and of 15,000 horse-power. The vessel is to least exertion. have a speed of 24 knots, or 27.6 statute miles per hour, and will be by far the fast-

est cruiser in the world. An English firm is introducing window frames of pressed steel, intended to supercede the cast iron now frequently used. These new frames have the advantage of lightness, strength and cheapness as compared with other material.

What We Believe.

We believe in Lord Bacon's maxim-"Knowledge is power," but only when i

is properly applied. We believe a farmer is skilful in his profession when he avails himself of the information he can get from the experience

We believe that printing promoted all the arts and science and agriculture no the least.

We believe that if a farmer once feels that he is above his calling his failure is

We believe that the farmer should never admit guests into his house who are unwilling to feed upon the products of his

We believe that bad husbandry is the greatest cause of bad crops. We believe in small farms and superior

cultivation performed in due season. We believe that some few men can manage large farms to advantage, but small farms suit the average farmer much better. We believe that a large farm, devoid of

skill, capital and industry is a curse to its We believe the farmer should try experiments, but at first only on a small scale. Finally we believe that a large farm in unskilful hands is very much like selfrighteousness-the more you have of it, the worse you are off.

----Cogitations.

Too much beer is apt to put men a The man born in a cabin may some day name a cabinet. The roughest roads are those we have no

You can't size up an orator by the dimensions of his mouth.

traveled over.

Many handkerchiefs are moistened by sorrows that never occur.

A politician left alone with his conscience sees mighty little company.

A bridge should never be condemend un til it has been tried by its piers.

Women's sweet disposition is always

shown by her husband's long hair. In diving to the bottom of pleasures we bring up more gravel than pearls. Women are not inventive as a rule

They have no eagerness for new wrinkles. Hope builds a nest in a man's heart where disappointment hatches its brood. Minds of moderate caliber ordinarily condemn everything which is beyond

Ambition is like a strong horse: if the rider have good control of the reins it may

carry him to the highest success; if not, it may carry him to destruction. There is something seriously wrong if the boy, on returning from college, does not display increased respect for his mother and sisters. "Love thy neighbor as thyself." But not if you use tobacco or drink whisky, don't poison anybody.

THE CHANGE PROPERTY The Moon's Influence.

The moon has no appreciable influence upon plant and animal life on this planet, and no well-informed intelligent farmer ever pays any attention to the different phases of the moon in performing any agricultural operation. The idea of the moon's influence upon plants and animals inhabiting this planet is a relic of ancient superstition and general ignorance. It is true that the imaginary line known as the zodiac was of some assistance in imparting a knowledge of the movement of the planets before the invention of the telescope, but the introduction of this instrument at once destroyed the old idea that no planets existed beyond the limits prised to find three pounds of beans of the zodiac. The socalled signs of the zodiac are the mythicial offsprings of an

It requires more strength of character to withstand the assaults of our prosperity, than to patiently endure the pinches of

adversity.

Phil Armour's pork packing busine in Chicago is said to amount to \$63,000.

badge of the Loyal Legion. Emile Grainer, the French millionaire is credited with having done more than any other one man toward the development of the state of Wyoming. In the eight years he has lived there he has spent \$400,000 in the work. His first winter's experience made him a rheumatic cripple for life.

Herman Hoffer, a six-year-old boy, recently committed to the New Jersey reform school at Jamesburg, is a little over four feet high, has a blond mustache and can strike a blow that would do credit to a pugilist. He weighs 142 pounds, can lift 200 pounds, and set a barrel of flour on its end without the

Prevention in the Care of the Teeth. A lady read an article in a French paper entitled "The Care of the Teeth," and so delighted was she with it that she took it to her New York dentist for him to read. Now this dentist happens worker, and he wrote his patient to the

following effect concerning the flaws he discovered in the article: "The writer states that if the saliva be strongly alkaline, large deposits of tartar will be found about the teeth, which of course is perfectly true, but he goes farther, and, reasoning from the fact that tartar is dissolved by acids, he at once recommends the use of acid tooth powders and washes, an error into which many theorists before him have fallen

It must be borne in mind that tartar is composed mainly of the phosphate and carbonate of lime, and so are the teeth. Therefore any acid that is strong enough to dissolve the tartar will also dissolve "The thing is to keep tartar from getting on the teeth. 'An ounce of prevention

is worth a pound of cure." Morning and night and after each meal the teeth should be thoroughly brushed, supple mented by the use of floss silk after each meal to cleanse between the teeth where the brush cannot reach. The writer of the article in question fails to mention the floss silk, which is so important al ways to have at hand.

"He also recommends soft toothbrushes so that the gums may not be injured Now it is a well known fact that any part of the human system is toughened by regular exercise, as the palms of the hand, etc., and I claim that the gums should be brushed thoroughly, always in a direction toward the cutting edge of the teeth, the result being a hardening

of the gum surface which will soon per mit of the use of the hardest brushes without causing any irritation whatever "Having brought the gums up to this splendid condition of health, the stiff brush, so far from injuring them, con tributes to their density and toughness and is much more serviceable in keeping tarter from the teeth than the soft brush recommended by the French writer."-

New York Epoch. Tracing a Railroad Car. One of the best jobs in car tracing that was ever done in this country was completed about three weeks ago by a car tracer of the New York Central. That road had lost a car, and sent out the tracer to look it up. He followed it west to Pittsburg, then to Cincinnati, then to Chicago and from there to St. Louis Here he lost track of it, but after some in gold. search found it had been in an accident and had been repainted. By some over

sight the number had been changed, but taking the new number, he chased the car to Kansas City, where he found i had been loaded and sent on to Galves ton. To Galveston he went, and there found that, after taking a fresh load, the car had gone to San Francisco. He went after it, but on reaching San Francisco found the car had gone back to Galves ston. By this time his blood was up and he made up his mind to find that car if it took the balance of his natural

So he went back to Galveston, and, to make a long story short, followed that car to New Orleans, to Mobile, to At lanta, to half a dozen places in Florida then back to New Orleans, to Galvestor again, and thence to Kansas City, and from there to Chicago. He had now been on the hunt for over three months but had got so close to the runaway that just as he came into Chicago by one road the car left it over another on its way to Buffalo. Its load was consigned to that point, and when he ascertained the fact he telegraphed on to have the car held and took the next train for the east. At Buffalo he came up with the car and caught his first sight of it. He had traveled almost constantly for over thirteen weeks, traversing a distance of 10,000 or 12,000 miles.—Interview in St

Louis Globe-Democrat. The Trade Rats of Arizona. A miner near the Senator recently had a rather singular experience with trade rats, known also as mountain rats. As the nights were cold the miner took his ore sack to replenish his rather hard bed Having neglected to come to town for several weeks his supply of beans had given out, and he had come down to a diet of straight bacon. Considerably out of humor, he started in to pull hi bed to pieces one morning, and in removing the sacks was agreeably surwith a little coffee mixed, which the

New Discovery by Accident FRESS

HAIR ON THE NECK, FACE, ARMS OR ANY PART OF THE PERSON TO INTRODUCE IT.

quickly desolved and permanently removed with QUEEN'S ANTI-HAIRINE, the new and wonderful discovery. Discovered by accident, while compounding a solution, a part was accidently spilled on the hand, and on washing afterward it was discovered that the hair was completely removed. It is perfectly harmless, and so simple any child can use it. Lay the hair over and apply for a few minutes, and the hair disappears as if by magic. No scientific discovery ever attained such wonderful results. Thousands who have been annoyed with hair on their FACE, NECK and ARMS attest its merits. It cannot fail. If the growth be light, one application will remove it permanently, the heavy growth such as the beard or hair on moles may require one or more applications before all the roots are destroyed, although all hair will be removed at each application without the slightest pain or injury when applied or ever afterward. Young persons who find an embarrassing growth of hair coming can also use it. Harmless as water. Price of Queen's Anti-Hairine \$1, per bottle, sent in safety mailing boxes postage paid by us, (securely sealed for moservation). Send money or stamps by letter with full straight forward in every word it contains. We invite you to deal with us and you will find everything as represented. Address Queen Chemical Co., 174 Race Street, Cincinnati, Ohio. You can register your letter at any Post Office to insure its safe delivery. We will pay \$500. for any case of failure or slightest injury to any purchaser. Every bottle guaranteed. SPECIAL—To ladies who will introduce and sell among their friends 25 Bottles of Queen's Anti. Hairine we will present with a Silk Dress 15 yards best silk. Extra large bottle and samples of silk to select from sent with each order.
