Accidents To Children.

Small particles of dust, cinders and minute chips of mental frequently get in the eye, with much resultant irritation and even inflammation, if not removed in a reasonable time. What is at first a very loose attachment of such a body, says the Jenness Miller Monthly, soon becomes a firm entanglement by the vigorous rubbing so often employed. The sense of itching and irritation makes it very hard to refrain The child, however, should be told to simply keep the affected eye closed, when the free flow of tears called forth by the irritant will safely wash out the offending matter. If this is not effectual, grasp the

out. Most foreign bodies get entangled in the upper lid, so that this proceeding is usually effectual, if such body is not deeply and firmly attached. If the body still remains, the lids must be everted over a pencil, and all parts, including the ball of the eye, be carefully examined in a good light. The disagreeable sensation may remain several hours or longer after the body has been actually removed, from the irritation already set up. This can be palliated by freely bathing the lids with very hot water, holding a sponge so saturated over the closed eye. Little children not infrequently place small objects, such as peas, shoe-buttons or beans, in the nose. At first they may be

The best and cheapest Farm, Field and General Purpose Fence on Earth. Over 30 miles sold in Queen Anne's county in two months. It is now being extensively used in Druid Hill Park, Baltimore, and is highly recommended. C. H. Latrobe, Esq.: Will last a lifetime, and only 3 posts to the one hundred feet. ITS ADVANTAGES:

Being a SELF-REGULATING it is always ready for business, slacks up for 30° below as cheerfully as it takes a new grip for 90° in the shade, gently, but firmly, persuades a runaway team to reconsider its action. An unruly bull is as safe as a canary in its cage; it saith unto the festive hog, "thus far shalt thou go." The fierce wind and drifting snow pass by and it heeds them not. There is no terror in the locomotive spark. The trespasser is not led into temptation, and the rail stealer's "occupation is gone." The hired man and the lagging tramp, alike scorn its proffered shade. Like the model housewife, when well-supported, it is always neat and tidy. Its one failing is the continual tugging at the end posts. The requisite strain of several at the end posts. The requisite strain of several tons needs thorough bracing and anchoring of these posts. But forewarned is forearmed, COMPARATIVE COSTS.
