The Salisbury Advertiser advises farmers to sow scarlet clover immediately to make up for the short hay and fodder crop. Seed in good ground well prepared about a peck to the acre, early in September. Every farmer who can possibly do so will find it to pay him handsomely, if he is short of hay or fodder.

THE question as to the validity of the legislation of 1892 in regard to the tenure of office of the boards of county commission: ers in several of the counties has again arisen and recently has been much discussed. Attorney-General Poe, who gave an official opinion on the subject to the Senate on March 4, 1892, and to Chairman Walker of Kent, has received inquiries from all parts of the State within the past few weeks in reference to the matter. Mr. Poe says he has seen no reason to change the opinion he gave. The Republicans in most of the counties are nominating candidates for commissioners, but it is only for political capital. They know the Attorney General is right. The Democrats, throughout the State, sustain the opinion and have refused to nominate in any

The question now on every one's lips is: "What will be the effect upon the Senate 1893, as furnished by the State tax comof the immense majority for the Wilson | missioner: bill in the House?" That it will have some effect in the way of stirring Senators up to a realization of action without further delay is generally agreed. One Senator from a Southern State said he believed the result would be the passage of a repeal bill through the Senate within two weeks. On the other hand, Senator Stewart and his supporters from the silver States declare they are not beaten and will not give up without a stubborn fight.

STEPHEN L. WRIGHT, of Queen Anne's county, one day last week lost a valuable cow from the effects of eating the branches of a wild cherry tree.
