SEE WHAT WE SEE.
SACCO-VANZETTI.
STUDY VITAMINS.
EGYPT AND U. S. A.

Recently Mr. Gifford, head of the telephone company, proved that "television," making it possible to see and hear individuals or crowds hundreds of miles away, is practical. The question, "How can that be made useful?" is answered in a way that in centuries to come will shed light on our civilization.

"There is no doubt about it," you are told, "the only way in which television can be made profitable is IN CONNECTIONS WITH PRIZE FIGHTS." People will pay well to see men fighting and to hear the yells of the mob gathered around the prize ring. Would television make money enabling distant crowds to see and hear great preachers or college professors? It would NOT.

A conference of college students has decided against trial marriage. Quite solemnly by a vote of 16 to 7. Wise Providence has decided against it by a vote of about 100 to 0.

When the seven young gentlemen who think they believe in trial marriage fall in love, they will know positively the marriage they plan is to last forever, would detest the theory of a trial, and insult anybody body suggesting it.

Or if not, they would be worth marrying.

"It would be better for Massachusetts and the administration of justice generally, if a commission could be appointed to investigate the evidence on which Sacco and Vanzetti are condemned to die." That is the opinion of the Rev. Roland D. Sawyer, Congressional clergyman and member of the Massachusetts Legislature. The commission, for which he introduces a bill, would consist of the Chief Justice of the Massachusetts Supreme Court and four others to be appointed by the Governor. The commission would be authorized to recommend to the Governor a new trial or such course as might seem necessary.

The impression that justice in the United States is in a hurry to execute anybody or determined to do so should be carefully avoided. This is a case that has never been passed upon, as regards the evidence, by any but one judge, and a case in which after-the-war excitement played a considerable part.

An Egyptian tomb near the Giza Pyramids, opened by Vienna scientists, contains the record and number of a very rich dwarf married to an impoverished princess, thousands of years ago.

Our rich princesses marry mental dwarfs, rich in titles. That's the difference, and that Egyptian princess had the better of it. She got something in exchange for her hand, with the long, tapering fingers.

Interest yourself in vitamins. Dr. H. C. Sherman, learned professor of chemistry, proves that vitamins bring maturity earlier and make it last longer. Vitamins are found in milk, butter, lettuce and all green vegetables, cod liver oil, red wine (barred here) fruits, yeast, etc.

In addition to vitamins, mineral salts are absolutely necessary to life. No animal can live without them.

Public school education should include information on diet. Mothers especially are interested in vitamins. Experiments with animals show vitamins influence the number of the young and successful rearing after birth.

There is much prosperity in this country and, fortunately for us, it is not all based on "natural resources"—oil, iron, coal, forests, good soil, etc. Most of it comes from inside the national skull. Sir Ernest Benn observes that American prosperity is in many cases, five per cent natural resources, ninety-five per cent work intelligently organized. If natural resources alone counted, "Brazil, Liberia and Iceland would be the world's most prosperous countries."

Commander Udet, greatest German flier left over from the war, will fly in a gliding plane without any engine from a mountain peak in Bavaria, 2000 feet high.

This means literally tobogganing from the top of a mountain to the valley below on thin air. It would astonish those long dead and buried that used to smile at the poem describing Darius Green and his flying machine.

For the month of February the United States imported 25,601 dozens of eggs and exported 2,776,775; while 4,787,904 pounds of cheese were imported as compared with 370,130 pounds exported. For February alone 4,385 more dozens of eggs were imported than last year while 94,552 more dozens were exported than last year. This is encouraging to poultrymen in that last year the exportation of eggs and poultry was less than the year before.

According to the weekly weather and crop bulletin of the Weather Bureau rainy weather delayed farm work in much of the interior of the United States during the week ending April 9. Temperatures were rather favorable, and vegetation made good growth in all central and southern districts, except in sections where it was too dry.

Boll weevil survival will be greater this season than in 1926 in many parts of the cotton belt, states a cooperative report on boll weevil emergence from cage test prior to April 1, released by the Department of Agriculture on April 13. Weather conditions have been conducive to weevil emergence this year more than during the same period of last year.

Those interested in dairying are privileged to use the United States Radio Farm School of the Department of Agricultural and in connection with same receive pamphlets which supplement the radio course. Dairy short course No. 6 entitled "Breeding" may be secured free of charge from the Department of Agriculture.

Up until April 12 peach orchards of Delaware were not damaged by frost notwithstanding the fact that some varieties were well out according to W. T. Derrickson, Director of the State Bureau of Markets. The trees around Milton, Bridgeville, and throughout central Kent County are in excellent shape and the prospects are that there will be a heavy crop this year.

The strawberries in the State are reported in good shape and unless something unforeseen happens, berries will begin to move around the 22nd of May.

Sweet potatoes in storage have been pretty well cleaned up and but a few carloads of apples remain.

Does Louisiana lead the States in the production of strawberries? Read, Mr. Reader, read. In 1926 Louisiana produced 24,975,000 quarts while Maryland produced 34,080,000 quarts; but since Louisiana growers received an average of 20c a quart and the Maryland growers received only 15c a quart, the total return to Louisiana was nearly \$2,000,000 more than that to the Maryland growers.

The representatives of the tomato growers in Florida called on President Coolidge on April 8 seeking an increase in the tariff on tomatoes, peppers, and other vegetables from Cuba and Mexico. Petitions are also being sent to Washington to by tomato growers in various sections of the country in order that the foreign supply of these crops will not continue to hold the market down allowing such a close margin of profit.

Cooperation of all units in an industry seems to be the basis of success in modern times. The farmer being an individualist for so many years finds it difficult to link his activity with other farmers of his section, pool their interests, and work together as a big business unit. If farming and marketing of crops can be successfully done then there is no need for suggesting any improvements; but if there is a lack of profit in agriculture, might it not be due to the failure on the part of the farmer to realize the changes in modern economic life?

W. M. Jardine, Secretary of Agriculture, in an address before the Boston Chamber of Commerce declared "What New England ought to do in all products for which it is adapted is to meet effectively the competition of other regions. It can do with other products what it is now doing with potatoes and onions. How can it do this? In the first place, it can reduce the cost of production. In the second place, produce what the market demands. Finally, to carry out a sound program for the betterment of agriculture we must have organization on the part of the farmers."

These principles which Secretary Jardine applies to New England might be applied in any section with profit to the farmer.

ONE BEST WAY

There are several ways of saving money but there is ONE BEST WAY and that is through the Kent Building & Loan Company. Stock matures at the end of 4 1/2 years and then it pays a very satisfactory sum. 25 cents per share per week.

Radio Boss

First picture of retired Admiral William H. G. Bullard, Chairman of the New Federal Radio Commission just back in the U. S. from China to take up his new job, control of radio.

One day a man walked into a fur store and said:
"I want to get a set of furs like 'Next ones in the window.'"
"Oh, you mean skunk?" said the salesman.
(Ed. Note.—May he rest in peace.)

"Dick almost drowned last night."
"No! How come?"
"The pillow slipped, the bed spread and he fell into the spring."

Mistress: "I saw the milkman kiss you this morning. I'll take the milk in myself after this."
Janet: "It won't do you any good mum. He promised me he would kiss no one but me."

Salesman: "This car has a wonderful pickup."
Dignified banker: "Neither my wife nor myself are interested in it."

Speed Dancer: "Well, Ed, I hit 60 in the old better hot night."
Ma Wooman: "Goodness, was any of them hurt badly?"

that sort of thing."
He: "I am a self made man. I began life as a barefooted boy."
She: "Well, old dear, I wasn't born with shoes on, either."

"I guess I may as well double my income," said the newsboy, as he folded his dollar bill.

"I say, Tailor, my bill should be thirteen dollars, and you've made it fourteen."

"Well, I thought you might be superstitious, sir!"

"A reference, Jane?" exclaimed

Radio Service What It Means To The Prospective BUYER

No matter how well a radio works at first there comes a time when some trouble will develop.

In most cases a small adjustment will be all that is necessary.

To give efficient service, one first of all, must have the technical knowledge and the practical experience.

Before investing in a Radio see if the dealer is capable of giving you REAL RADIO SERVICE.

ALL This can be had, free for one year, with the purchase of any of our Radio sets. WE REPAIR ANY MAKE OF RADIO. AUTHORIZED DEALER for RADIOLA and DAY-PAN.

NOW YOU CAN WAX-POLISH ALL YOUR FLOORS AND LINOLEUM

Easily—Electrically—ten times faster than by hand

Gleaming waxed floors are no longer a luxury—NOW you can have their radiant glow in every room. The new Johnson's Wax Electric Treatment makes WAX the most economical of floor finishes. This treatment takes only a few minutes—there is no hard work—no stooping or kneeling—no messy rags and pails. It won't soil or roughen your hands! And it saves you all the bother and expense of frequent refinishing.

This Johnson's Wax Electric Treatment is so easy anyone can use it. Just spread on a thin coat of Johnson's Polishing Wax with a Lamb's-wool mop. This cleans as it waxes. Then run the Johnson Electric Polisher over the floor and let ELECTRICITY do all the work. This Electric Floor Polisher is much easier to run than a vacuum cleaner—it glides along silently, smoothly, leaving a path of beauty behind it.

It makes no difference whether the floors are old or new—of wood, linoleum, tile or composition. Nor how they are finished—with varnish, shellac, wax or paint.

You can RENT THIS ELECTRIC FLOOR POLISHER FOR \$2.00 A DAY and in just a short time give all your floors and linoleums this beautifying wax treatment.
