 FARMS AND MACHINES.
 OIL WASTE—PAY LATER.
 OUR CIGARETTE TAX.
 FORD NO. 15,000,000.

The hope of the farmer is in better machinery and more intelligent use of it. It is not alone the selling price of a bushel of wheat that counts but the amount of farm time and labor used to produce the bushel. A man working with pick and shovel could not afford to dig up and sort out gold bearing gravel if it paid him five dollars a ton average. But giant dredging machines in the Sacramento Valley are making millions working gravel that pays less than twenty cents a ton.

Edwin J. Clapp shows what machinery is doing and will do to help solve farm problems, and why United States farms can compete with European cheap labor, and even high railroad freight rates.

On American farms, one worker on the average produces twelve tons of cereal. In Europe one worker produces one and one-half tons.

From 1910 to 1920, American farm population increased only four per cent, while production of wheat increased fifty-eight per cent, corn thirty-five per cent, cotton forty-seven per cent, cattle thirty-seven per cent, hogs sixty-five per cent.

The farm problem is not to be solved, according to Mr. Clapp, by "keeping the boys on the farm," but by letting the boys go to the factories, using more machinery on farms and thus reducing cost of production.

"Light automobiles and trucks are being produced in greater volume than ever before." Such is the official report. There is only one cloud on the automobile horizon, and that's an oil cloud.

Reckless production and reckless price cutting in the oil industry mean trouble ahead for motor owners. Oil is being wasted, poured out and squandered on sandy roads, wherever public officials can be persuaded to buy it at public expense.

Oil production is wastefully managed, prices are low—but today's low prices will be paid for with high prices later.

The country needs a continuous oil and gasoline supply, at fair prices which the Government should regulate.

The nation now is acting like a drunken youth, squandering a rich inheritance.

Lindbergh has good ideas. An enthusiastic French lady intended to spend 150,000 francs for a cup to celebrate his flight. He accepted gratefully and asked that the 150,000 francs be spent instead on children of French aviators who lost their lives promoting aviation. Lindbergh is a good representative of this country in Europe.

When Count Witte was in this country, representing Russia in the peace arrangements with Japan, he told this writer the national monopoly of vodka, the Russian drink, forty per cent alcohol, and sixty per cent water, which he originated, gave a profit just big enough to pay the cost of the Russian army.

It would interest Witte to know that the United States tax on cigarettes just about pays the cost of our army. Uncle Sam collected \$227,000,000 in ten months this year from cigarette smokers.

A full fiscal year's cigarette tax will about pay all army costs.

If Government could collect the tax that the public pays to bootleggers it might pay for ALL Government expenses.
