**FLOOD RELIEF SESSION.
LESSON FOR UNCLE SAM.
YOUR IMPORTANT CELLS.
WOMEN NATURAL TEACHERS**

The President will call a special session of Congress for October, to take up the Mississippi flood disaster and the prevention question. The sooner prevention is discussed and arranged the better. The American Congress and people have a great faculty for forgetting—even a two-billion-dollar calamity and 700,000 people being made homeless.

Twice in succession, American fliers have crossed the Atlantic at one "hop" Lindbergh flying to Paris, Chamberlin with Levine, almost to Berlin.

What will military and naval gentlemen saw now about their theory that "the airplane is no real menace to this country?"

Out of two attempts to fly across the ocean by American fliers, both succeed.

What would be the probable percentage of success if five thousand foreign aviators, with full government backing and unlimited expenditure of money, should fly the other way on a hostile errand?

Americans should take to heart the lesson that Lindbergh and Chamberlin have taught us and get ready to keep hostile fliers away from this continent.

Five or ten thousand first-class planes, carrying mail parcels and passengers in peace, ready to take on machine guns in war, would be the best investment this rich nation could make.

Golf, according to accident insurance companies, comes third among "dangerous sports." Victims of 461 golf accidents collected insurance last year. Twelve for "cuts with sharp instruments." The instruments were bottles, on the "19th hole." However, for one man injured at golf, one hundred die for lack of exercise, so play golf.

A German scientist says your heart is less important than the billions of cells that make up your body. The heart is important, of course, but the cells, eating, drinking, digesting, each living a separate life, are more important than the heart, even in blood circulation.

The human body is like a nation. Brain and heart are the government. The cells are the citizens, and most important.

Dr. Mendelsohn, of Berlin University, says, "The secret of life is the ability of living cells to effect change of matter and absorb and eject fluids. This change of fluids seems to be the principal cause of blood circulation."

The secret of making life worth while is the ability of the living brain to accept and absorb new ideas. That is the principal cause of human progress.

Students at Oxford worry because women are to teach there. "Isis," read by the Oxford young gentlemen, says that will eventually lead to a sex war, and is "a social revolution of the utmost significance."

Women are natural teachers; teaching has been their business from the beginning, teaching children, teaching husbands.

The college boy or adult citizen lacking respect for women or confidence in their power, judgment and goodness, pays a poor compliment to his own mother.

Scholarship Examinations

Competitive examinations for those applicants residing in Kent County, Maryland, who wish to compete for the following scholarships vacant at the end of the current school term in June, 1927, will be held at the School Board offices, Chestertown Elementary School building, on Saturday, June 25th, 1927, beginning at 9:30 a. m.

1 two year scholarship at Blue Ridge College, New Windsor, Maryland, open to boys or girls; covers tuition only.
